algebra math puzzle: 100 Math Brainteasers (Grade 7, 8, 9, 10) Zbigniew Romanowicz, Bartholomew Dyda, 2014-01-23 100 Math Brainteasers (Grade 7-10) is a subtle selection of one hundred arithmetic, algebra, and geometry assignments, which efficiently train the mind in math skills. It will be helpful for students attending High School and also in preparation for Mathematical competitions or Olympiads at a younger age. The assignments can equally be used in the classroom or in extracurricular activities. The fun and games are delightful, original, and solving them is even more enjoyable thanks to the funny illustrations. Most of the math problems do not require any exceptional mathematical proficiency, but above all, they challenge one's creativity and ability to think logically. Only a few solicit the knowledge of algebraic expressions and rules of geometry.

algebra math puzzle: Hard-to-Solve Math Puzzles Derrick Niederman, 2001 Put your mathematical thinking cap on--because even though these puzzles are toughies, they take insight and brainwork to solve, not a knowledge of calculus or linear algebra or any other kind of advanced math. Consider for a moment: * How can you divide a regular pentagon into five identical pentagonal shapes? * What is the only decade in American history to contain four prime-numbered

years? * What three right triangles with integer sides have areas numerically equal to twice their perimeters? Don't worry if the answers don't spring to mind immediately; you'll have plenty of company. Compute without calculators; study the survival of the fittest by arithmetically analyzing a little amoeba reproduction; and investigate whether or not a rich man's children are getting a square deal with their inheritance. Just don't give up, because you'll have a lot of satisfaction when you figure them out.
