dave fun algebra class: World's Best Hobby Dave Bell W6AQ, 2014-06-02 Worlds Best Hobby is an unusual title for a memoir, which is exactly what this book is. Its my life in the fascinating hobby of Amateur Radio. Much of my professional life is spent producing documentary and reality

programs for television (including more than a few about Ham Radio) where I learned that the purpose of a title is to attract an audience and if it was also true, all the better. The challenge with documentary films is to make them entertaining first and foremost, and informational if possible. I've tried very hard to make this book entertaining, and from feedback I've gotten (from Hams and wannabee Hams who found it posted online as I was writing it) I've succeeded, at least to some extent. I tried to make the book fun because Ham Radio is fun. And Ham Radio has more facets than a cheap diamond, as you'll discover as you dig into Worlds Best Hobby. Enjoy! PS. Let me know what you think of Worlds Best Hobby especially if you like it. 73, Dave Bell, W6AQ

dave fun algebra class: The Second Continuum: Book One of the Collective Cosmos

Series Dave Stanson, 2018-10-30 Jim Mulligan is about to find out that the reality of a do-over is vastly more complex than he ever imagined. Waking up from a car accident that should have killed him, he finds himself uninjured in his seventeen-year-old body, in the 1980's. Seeking to rewrite his failed life, he is frequently thwarted by diversions, temporal paradoxes and his own character flaws. The Second Continuum is a story of one man's second chance, the rewards and pitfalls of taking the other road, the weakness of moral relativism and the profound consequences of indulging personal desires with a gift meant to be used for the greater good. It asks the question what-if and shows that even attempts at doing right can go terribly wrong. A story of the practical challenges of involuntary time-travel: the inter-connectedness of every choice in life, how certain events shape a person, and how memory conflicts with fact.

Born into a family of migrant workers, toiling in the fields by the age of six, Jose M. Hernández dreamed of traveling through the night skies on a rocket ship. *Reaching for the Stars* is the inspiring story of how he realized that dream, becoming the first Mexican-American astronaut. Hernández didn't speak English till he was 12, and his peers often joined gangs, or skipped school. And yet, by his twenties he was part of an elite team helping develop technology for the early detection of breast cancer. He was turned down by NASA eleven times on his long journey to donning that famous orange space suit. Hernández message of hard work, education, perseverance, of reaching for the stars, makes this a classic American autobiography.
