anatomy and physiology bootcamp: Cosmetic Bootcamp Primer Kenneth Beer, Mary P. Lupo, Vic A. Narurkar, 2011-01-18 Minimally invasive aesthetic procedures continue to be popular with patients, so many medical practitioners who have not previously specialized in the field or practiced very widely are either turning to this area or expanding the range of treatments they currently offer. These practitioners require a basic primer to get them up to speed on the details of treatments, as well as expert tips on the idiosyncratic demands involved in running an aesthetic practice. The Cosmetic Bootcamp meetings began as a way for colleagues in dermatology, plastic surgery, ophthalmology, and otorhinolaryngology to teach each other in a collegial environment. The meetings are designed to provide physicians in these specialties a forum to exchange ideas, explore new technologies and techniques, and discuss ways to improve patient care. The focus is on advancing the science and outcomes using a multidisciplinary approach. Drawn from these meetings, Cosmetic Bootcamp Primer: Comprehensive Aesthetic Management presents a succinct but comprehensive textbook from a team with extensive experience in training newcomers to the

field of aesthetic practice. The first part of the text details how a practice needs to be run for optimum impact and efficiency. Both new and seasoned practitioners will find much advice in this section for improving their daily office operation to help them compete effectively. The second section reviews the essentials of the clinical treatments. Each of the core aesthetic specialties are included, and chapters contain what the editors consider essential information as well as a few pearls. The book is supplemented with downloadable resources to enable users to experience the flavor of the actual Cosmetic Bootcamp meetings.
