sonic character anatomy: Anatomy of Sound Jacob Smith, Neil Verma, 2016-07-19 This collection of essays examines one of the most important, yet understudied, media authors of all time--Norman Corwin--using him as a critical lens to consider the history of multimedia authorship, particularly in the realm of sound. Known for seven decades as the 'poet laureate' of radio, Corwin is most famous for his radio dramas, which reached tens of millions of listeners around the world and contributed to radio drama's success as a mass media form in the 1930s and 1940s. But Corwin was a pioneer in multiple media, including cinema, theater, TV, public service broadcasting, journalism, and even cantata. In each of these areas, Corwin had a distinctive approach to sonic aesthetics and mastery of multiple aspects of media production, relying in part on his inventive atmospheric effects in the studio both prerecorded, and, more impressively, live in real time. From the front lines of World War II to his role as Chief of Special Projects for United Nations Radio and his influence on media today, the political and social aspect of Corwin's work is woven into these essays. With a foreword by Michele Hilmes and contributions from Thomas Doherty, Mary Ann Watson, Shawn VanCour, David Ossman and others, this volume cements Corwin's reputation as perhaps the greatest writer in the history of radio, while also showing that his long career is a neglected model of multimedia authorship.--Provided by publisher.

sonic character anatomy: *Being Modern* Robert Bud, Paul Greenhalgh, Frank James, Morag Shiach, 2018-10-10 In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. *Being Modern* builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, *Being Modern* paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students, and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part, and to supersede such tired formulations as 'Science and culture'.

sonic character anatomy: *Voicing Girlhood in Popular Music* Jacqueline Warwick, Allison Adrian, 2016-06-10 This interdisciplinary volume explores the girl's voice and the construction of girlhood in contemporary popular music, visiting girls as musicians, activists, and performers through topics that range from female vocal development during adolescence to girls' online media culture. While girls' voices are more prominent than ever in popular music culture, the specific sonic character of the young female voice is routinely denied authority. Decades old clichés of girls as

frivolous, silly, and deserving of contempt prevail in mainstream popular image and sound. Nevertheless, girls find ways to raise their voices and make themselves heard. This volume explores the contemporary girl's voice to illuminate the way ideals of girlhood are historically specific, and the way adults frame and construct girlhood to both valorize and vilify girls and women. Interrogating popular music, childhood, and gender, it analyzes the history of the all-girl band from the Runaways to the present; the changing anatomy of a girl's voice throughout adolescence; girl's participatory culture via youtube and rock camps, and representations of the girl's voice in other media like audiobooks, film, and television. Essays consider girl performers like Jackie Evancho and Lorde, and all-girl bands like Sleater Kinney, The Slits and Warpaint, as well as performative 'girlishness' in the voices of female vocalists like Joni Mitchell, Beyoncé, Miley Cyrus, Taylor Swift, Kathleen Hanna, and Rebecca Black. Participating in girl studies within and beyond the field of music, this book unites scholarly perspectives from disciplines such as musicology, ethnomusicology, comparative literature, women's and gender studies, media studies, and education to investigate the importance of girls' voices in popular music, and to help unravel the complexities bound up in music and girlhood in the contemporary contexts of North America and the United Kingdom.

sonic character anatomy: Beckett, Lacan and the Mathematical Writing of the Real Arka Chattopadhyay, 2019-01-01 Beckett, Lacan and the Mathematical Writing of the Real proposes writing as a mathematical and logical operation to build a bridge between Lacanian psychoanalysis and Samuel Beckett's prose works. Arka Chattopadhyay studies aspects such as the fundamental operational logic of a text, use of mathematical forms like geometry and arithmetic, the human obsession with counting, the moving body as an act of writing and love, and sexuality as a challenge to the limits of what can be written through logic and mathematics. Chattopadhyay reads Beckett's prose works, including *How It Is*, *Company*, *Worstward Ho*, *Malone Dies* and *Enough* to highlight this terminal writing, which halts endless meanings with the material body of the word and gives Beckett a medium to inscribe what cannot be written otherwise.
