the anatomy of a fall streaming: Pivoting and Producing for Online TV Alexa Scarlata, 2025-05-02 The introduction and diffusion of international subscription video-on-demand (SVOD) services in the 2010s represented the most significant disruption of established national broadcast and pay-TV ecologies in their long history. Using an in-depth Australian case study, this book narrates this profound period of proliferation. It also considers how incumbent commercial networks, pay-TV providers and public service broadcasters developed into online TV providers, albeit in assorted ways. In so doing, it conceives of the early impact of online TV (2015-2020) more broadly and acknowledges the role of both new and old TV players. The industry-wide shift towards online TV over this period also impacted existing television drama production cultures. SVOD services provided a fruitful avenue for the distribution of existing archives and slowly began to support the production of new Australian content with an increasingly global focus. However, the formal arrival of online TV certainly did not usher in the boom in original local television drama many anticipated. *Pivoting and Producing for Online TV: Australia's Transition* advances the macro-analysis of television production strategies. This book will be useful to students and researchers interested in media, film, and cultural studies.

the anatomy of a fall streaming: Netflix, Dark Fantastic Genres and Intergenerational Viewing Djoymi Baker, Jessica Balanzategui, Diana Sandars, 2023-07-04 Focusing on Netflix's child and family-orientated platform exclusive content, this book offers the first exploration of a controversial genre cycle of dark science fiction, horror, and fantasy television under Netflix's Family Watch Together TV tag. Using a ground-breaking mix of methods including audience research, interface, and textual analysis, the book demonstrates how Netflix is producing dark family telefantasy content that is both reshaping child and family-friendly TV genres and challenging earlier broadcast TV models around child-appropriate family viewing. It illuminates how Netflix encourages family audiences to watch together through intergenerational dynamics that work on and offscreen. The chapters in this book explore how this Netflixication of family television developed across landmark examples including *Stranger Things*, *A Series of Unfortunate Events*, *The Dark Crystal: Age of Resistance*, and even *Squid Game*. The book outlines how Netflix is consolidating a new dark family terrain in the streaming sector, which is unsettling older concepts of

family viewing, leading to considerable audience and critical confusion around target audiences and viewer expectations. This book will be of particular interest to upper-level undergraduates, graduates, and scholars in the fields of television studies, screen genre studies, childhood studies, and cultural studies.

the anatomy of a fall streaming: Pandemic Play Carolyn Ownbey, Catherine Quirk, 2024-05-20 When the arts, culture, and entertainment industries came to a halt in late winter 2020, many claimed this was the end of art as we knew it. Theatre managers, museum directors, performers, artists, and everyday folks had to figure out new strategies for living and thriving in a new world order. As the global pandemic and its consequences continue to play out, the question of how we have learned—as creators or consumers—to play, is far from settled. This collection addresses pandemic play in broad terms: how did creative industries adapt to a majority virtual world? How have our understandings of community and play evolved? Might new forms of art and play outlive the pandemic and supplant earlier iterations? *Pandemic Play* takes these questions as a starting point, exploring strategies, case studies, and effects of the arts worlds gone virtual.

the anatomy of a fall streaming: Law at the Movies Stanley Fish, 2024-01-30 This book asks How can legal doctrine be turned into filmic art? By legal doctrine Stanley Fish does not mean the sonorous abstractions that usually accompany the self-presentation of law--Justice, Equity, Equality, Liberty, Autonomy, and the like. Rather he has in mind the specific rules and procedures invoked and analyzed by courts on the way to declaring a decision--lawyer/client confidentiality, the distinction between interdicted violence and the violence performed by the legal system, the interplay of positive law and laws rooted in morality, the difference between civilian law and military law, the death penalty, the admissibility of different forms of evidence. In the movies he discusses, these and other points of doctrine and procedure do not serve as a background, occasionally visited, to the substantive issues that drive the plot and provide the characters with choices; they declare the plot, and character is formed and tested in relationship to their demands. Apparently technical matters are pressed until they occupy both foreground and background and become the movie's true subject. If large, abstract concepts emerge, they emerge at the back end of doctrine and are, in effect, produced by doctrine. These are not law-themed movies; they are movies about the unfolding of legal process.

Kumar, 2006-04-11 James Altschuld, David Kumar, and their chapter authors have produced an upbeat, provocative, visionary, and useful volume on educational evaluation. Of special utility is its grounding in issues and practices relating to evaluations of science and technology education. The book should appeal and be useful to a wide range of persons involved in evaluations of educational policy, programs, and (less so) science teachers. These persons include science and technology education experts, educational policymakers, officials of the National Science Foundation, school administrators, classroom teachers, evaluation instructors, evaluation methodologists, practicing evaluators, and test developers, among others. Moreover, it provides a global perspective for assessing and strengthening educational evaluation in the US. Daniel L. Stufflebeam, Professor of Education and Director of the Evaluation Center, Western Michigan University For contents, contributors and a free preview: www.new-in-education.com
