On Christmas Day 2011, Ben Breedlove's soul went to heaven. But it wasn't his first time there. Ben suffered from hypertrophic cardiomyopathy (HCM), a heart condition that posed a constant risk of sudden death. His condition, a thickening of the heart muscle, worsened over time, leaving him weak and fatigued. It also led Ben to some close calls medically, in particular cardiac arrest on four separate occasions, during which he felt the presence of angels and experienced the perfect peace of heaven. Precocious and warm, Ben was close with his family and two siblings, and forged deep relationships with his friends. He loved to wakeboard and wake surf, and he had dreams of visiting foreign countries around the world. He created the YouTube channels TotalRandomness512 and BreedloveTV, and co-created the channel OurAdvice4You, where he posted videos about everything from dating advice for girls to more serious topics like his spirituality and heart condition. Unbeknownst to his parents and family, Ben created a two-part video called This Is My Story, in which he used flashcards to tell the world about his near-death experiences and his beckoning toward heaven. When he died a short while

later, at the tender age of eighteen, his family and the rest of the world stumbled upon these videos. The world responded with overwhelming acceptance of the message Ben shared. Sharing his vision of heaven was Ben's gift to his family, and to the world. And now this is the Breedlove family's gift to us - an in-depth look at the life and near-deaths of Ben, the strength and faith of a family, and ultimately, the hope of heaven. when does grays anatomy start: *Chronicity* Dagmar Rinnenburger, 2021-03-02 This book comprehensively and critically discusses chronicity as a crucial challenge for the future of medicine in an era of aging populations and the steady growth of non-communicable comorbidities. It describes how health systems that are still designed and based on the treatment of acute diseases are suffering from crowded emergency rooms and growing conflicts between patients, while medical staff increasingly face frustration and the risk of burn-out. The author not only shares her own clinical and personal experience in the care of end stage COPD or ALS patients with respiratory insufficiency, but also explores how primary care, incremental medicine and initiative medicine can improve the care provided for these patients. In turn, the book examines how developing countries are facing the chronicity issue in their daily struggles with communicable diseases like diarrhea and infections, and with non-communicable ones like obesity, diabetes and asthma. It also discusses the cost-related challenges that could accompany a possible paradigm shift from chronic to curable status, as was the case with hepatitis C. Due to the inevitable link between chronicity and end of life, the author tactfully addresses palliative care, focusing on the importance of shared decision-making as well as a full awareness of the future scenarios. Uniquely reflecting life-long clinical experience and stimulating discussion on a highly topical issue, this book appeals to a wide readership, from health professionals through caregivers to patients with chronic conditions.
