aer lingus business class sale: Strategic Management Silvio Bianchi Martini, Antonio Corvino, Andrea Dello Sbarba, 2024-11-07 This book explores the intricate world of strategic management. Blending theory with practical examples, the authors provide a systematic framework for strategic decisionmaking. The book is divided into two parts. It begins by exploring the perspectives of strategic analysis, examining the firm's "current situation" and "evolutionary" perspectives, as well as the "objective reality" and "subjective perspective". These interconnected perspectives require different analytical approaches to understand the firm's present state and the process of change. The second part, entitled "The strategic map: the areas, the pathway and the objects of analysis", delves deeper into specific areas of strategic analysis. It focuses on the current state of the firm (today's firm), emphasizing the importance of understanding its resources, products, markets, activities, and stakeholder relationships. The quality and implementation effectiveness of the strategic model are also assessed, providing a reflection tool for improvement. The book further explores strategic change processes, the values and identity of the firm, performance evaluation, and corporate governance and internal control system. Suitable for newcomers and professionals in corporate strategy and governance, this book combines theory and practical examples to enhance understanding.

aer lingus business class sale: Ryanland Philip Nolan, 2012-06-21 In this hilarious, no-holds-barred account, journalist Philip Nolan packs his bag (maximum 10kg, please) and takes us on an adventure that is not for the faint-hearted as he flies with Europe's biggest low-cost airline. Using Ryanair destinations as a route planner, we grab our boarding passes and fight for the first available seat as we travel with him to towns we've never heard of (Tampere and Wroclaw, anyone?) and to cities we've always wanted to visit. From watching the pilgrims completing the Camino in Santiago de Compostela to cheering with the fans in Frankfurt during the World Cup, from having his alpha waves channelled at a spa in Austria to a little soul cleansing at the baths at Lourdes, from the all-night party that is Riga to the eerie hush of Beauvais on a slow Monday night, we are treated to a kaleidoscopic snapshot of the quirks and foibles of a continent. Ryanair has opened up Europe's treasures, and a few complete dumps too, in a way never before possible. From Biarritz to Blackpool to Bratislava, Pau to Pisa to Porto, Vienna to Valencia to Venice, Philip Nolan completes a whirlwind tour of the continent he calls Ryanland. The journey is whimsical, wistful and laugh-out-loud funny, as we travel on a spellbinding no-frills odyssey.

aer lingus business class sale: Just Garret Garret FitzGerald, 2014-06-27 In Just Garret, Dr. FitzGerald writes frankly about his upbringing, his parents, his involvement in the Independence movement, their disagreements about the Treaty, his early years in school and college and his gradual entry into politics. aer lingus business class sale: Commoditization and the Strategic Response Andrew Holmes, 2016-05-23 Organizations and those who work within them are under attack from the

increasingly pervasive impacts of commoditization. With little to distinguish one company's products and services from another or one person's skills and capabilities from the next, organizations and workers alike are finding themselves trapped in the me-too hell of commoditization. For many this means the survival of the cheapest, as price becomes the principal basis for decision making. For others it requires them to think creatively to avoid the trap of commoditization, even though this may only provide a temporary respite. In this groundbreaking book, Andrew Holmes sets out why commoditization represents such a clear and present danger to every corporation and all white-collar workers. Starting with the nature of the commodities we are familiar with such as coal and cotton, Holmes moves on to describe how commoditization is affecting entire industries and is increasingly touching the work of the professional classes. The evidence is both fascinating and compelling and it is clear that the impacts of commoditization are far reaching. The author also outlines the impact of commoditization on an organization's strategy towards brand, supply chain, value chain, innovation, pricing and competition. He explores the implications for skills, attitudes and behaviours in the workplace before describing a series of strategies for avoiding the risk and exploiting the opportunities offered by a new commoditized world, such as outsourcing, innovation, offshoring, mergers and acquisitions, divestments and first mover advantage. Holmes offers organizations and white-collar workers a range of strategic responses which can be used to combat its worst impacts. And as commoditization continues to make inroads into the corporate and working worlds, this book will be an invaluable companion to addressing the challenges which it presents.

aer lingus business class sale: Air Transport in the 21st Century John F. O'Connell, George Williams, 2016-12-05 Airlines are buffeted by fluctuating political and economic landscapes, ever-changing competition, technology developments, globalization, increasing deregulation and evolving customer requirements. As a consequence all sectors of the air transport industry are in a constant state of flux. The principle aim of this book is to review current trends in the airline industry and its related suppliers, thereby providing an insight into the forces that are changing its dynamics. The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future. The book features two very distinct sections. The first contains short contributions from industry executives at CEO/VP level from airlines, aircraft/engine manufacturers, safety and navigational provider organisations, who have set out their take of where the airline industry is heading. This commercial input sets the scene for the book and provides the bridge to the second section, which is composed of 18 chapters written by distinguished academic authors. Each chapter presents a valuable insight into a specific area of the air transport industry, including: airlines, airports, cargo, deregulation, the environment, navigation, strategy, information technology, security and tourism. The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward. The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world. It is also written for airport authorities, aerospace manufacturers, regulatory and government transportation agencies, researchers and students of aviation management, transport studies, tourism and the wider air transport industry.
