alex karp business partners: *Wonder Boy* Angel Au-Yeung, David Jeans, 2023-04-25 A Financial Times best business book of 2023 In 1998, at the age of 24, Tony Hsieh sold his first company to Microsoft for $265 million. In 2009, at the age of 35, he sold his e-commerce company, Zappos, to Amazon for $1.2 billion. In 2020, at the age of 46, he died. Tony Hsieh revolutionized both the tech world and corporate culture. He was a business visionary. He was also a man in search of happiness. So why did it all go so wrong? Tony Hsieh's first successful venture was in middle school, selling personalized buttons. At Harvard, he made a profit compiling and selling study guides. From there, he went on to build the billion-dollar online shoe empire of Zappos. The secret to his success? Making his employees happy. At its peak, Zappos's employee-friendly culture was so famous across the tech industry that it inspired copycats and earned a cult following. Then Hsieh moved the Zappos headquarters to Las Vegas, where he personally funded a nine-figure campaign to revitalize the city's historic downtown area. But as Hsieh fell deeper into his struggles with mental health and drug addiction, the people making up his inner circle began changing from friends to enablers. Drawing on hundreds of interviews with a wide range of people whose lives Hsieh touched, journalists Angel Au-Yeung and David Jeans craft a rich portrait of a man who was plagued by his eternal search for happiness and ultimately succumbed to his own demons.

alex karp business partners: The Tech Coup Marietje Schaake, 2025-09-16 A tech insider who has been hailed by The New Yorker for her “forceful critique” of Big Tech describes what must be done to stop its erosion of democracy Over the past decades, under the cover of “innovation,” technology companies have successfully resisted regulation and have even begun to seize power from governments themselves. Facial recognition firms track citizens for police surveillance. Cryptocurrency has wiped out the personal savings of millions and threatens the stability of the global financial system. Spyware companies sell digital intelligence tools to anyone who can afford them. This new reality—where unregulated technology has become a forceful instrument for autocrats around the world—is terrible news for democracies and citizens. In The Tech Coup, Marietje Schaake offers a behind-the-scenes account of how technology companies crept into nearly every corner of our lives and our governments. She takes us beyond the headlines to high-stakes meetings with human rights defenders, business leaders, computer scientists, and politicians to show how technologies—from social media to artificial intelligence—have gone from being heralded as utopian to undermining the pillars of our democracies. To reverse this existential power imbalance, Schaake outlines game-changing solutions to empower elected officials and citizens alike. Democratic leaders can—and must—resist the influence of corporate lobbying and reinvent themselves as dynamic, flexible guardians of our digital world. Drawing on her experiences in the halls of the European Parliament and among Silicon Valley insiders, Schaake offers a frightening look at our modern tech-obsessed world—and a clear-eyed view of how democracies can build a better future before it is too late.

alex karp business partners: Giants Peter Phillips, 2018-08-28 A look at the top 300 most powerful players in world capitalism, who are at the controls of our economic future. Who holds the purse strings to the majority of the world's wealth? There is a new global elite at the controls of our economic future, and here former Project Censored director and media monitoring sociologist Peter Phillips unveils for the general reader just who these players are. The book includes such power players as Mark Zuckerberg, Bill Gates, Jeff Bezos, Jamie Dimon, and Warren Buffett. As the number of men with as much wealth as half the world fell from sixty-two to just eight between January 2016 and January 2017, according to Oxfam International, fewer than 200 super-connected asset managers at only 17 asset management firms—each with well over a trillion dollars in assets under management—now represent the financial core of the world's transnational capitalist class. Members of the global power elite are the management—the facilitators—of world capitalism, the firewall protecting the capital investment, growth, and debt collection that keeps the status quo from changing. Each chapter in Giants identifies by name the members of this international club of multi-millionaires, their 17 global financial companies—and including NGOs such as the Group of Thirty and the Trilateral Commission—and their transnational military protectors, so the reader, for the first time anywhere, can identify who constitutes this network of influence, where the wealth is concentrated, how it suppresses social movements, and how it can be redistributed for maximum systemic change.

In the weeks after the attack, the hackers released tens of thousands of e-mail messages and made headlines around the world. alex karp business partners: *The Contrarian* Max Chafkin, 2021-09-21 A New York Times Notable Book A biography of venture capitalist and entrepreneur Peter Thiel, the enigmatic, controversial, and hugely influential power broker who sits at the dynamic intersection of tech, business, and politics “Max Chafkin’s The Contrarian is much more than a consistently shocking biography of Peter Thiel, the most important investor in tech and a key supporter of the Donald Trump presidency. It’s also a disturbing history of Silicon Valley that will make you reconsider the ideological foundations of America’s relentless engine of creative destruction.”—Brad Stone, author of The Everything Store and Amazon Unbound Since the days of the dot-com bubble in the late 1990s, no industry has made a greater impact on the world than Silicon Valley. And few individuals have done more to shape Silicon Valley than Peter Thiel. The billionaire venture capitalist and entrepreneur has been a behind-the-scenes operator influencing countless aspects of our contemporary way of life, from the technologies we use every day to the delicate power balance between Silicon Valley, Wall Street, and Washington. But despite his power and the ubiquity of his projects, no public figure is quite so mysterious. In the first major biography of Thiel, Max Chafkin traces the trajectory of the innovator's singular life and worldview, from his upbringing as the child of immigrant parents and years at Stanford as a burgeoning conservative thought leader to his founding of PayPal and Palantir, early investment in Facebook and SpaceX, and relationships with fellow tech titans Mark Zuckerberg, Elon Musk, and Eric Schmidt. The Contrarian illuminates the extent to which Thiel has sought to export his values to the corridors of power beyond Silicon Valley, including funding the lawsuit that destroyed the blog Gawker and strenuously backing far-right political candidates, notably Donald Trump for president in 2016. Eye-opening and deeply reported, The Contrarian is a revelatory biography of a one-of-a-kind leader and an incisive portrait of a tech industry whose explosive growth and power is both thrilling and fraught with controversy.

alex karp business partners: *Megacapitalistas* Peter Phillips, 2019-09-19 Siempre nos preguntamos: ¿Quién maneja los hilos del mundo? Las dimensiones de la concentración de la riqueza en el mundo son apabullantes... Y temibles. Megacapitalistas es la respuesta detalladísima a esa pregunta. ¿Quiénes son exactamente los amos de la humanidad? Este libro de investigación pone cifras a la actual y pasmosa concentración de riqueza privada y poder corporativo, explica cuáles son sus instituciones y su estructura integrada y, además, denuncia la amenaza que esta élite supone para la existencia humana y civilizada. En este trabajo de investigación, Peter Phillips nos cuenta qué instituciones financieras y qué persones específicas son esos «gigantes», cuánto dinero manejan, cuáles son sus interconexiones, cómo organizan incluso la manera de pensar de la gente, de forma que no se le ocurra a nadie tratar de desafiar su poder. Phillips examina la riqueza y el poder de gente tan conocida como Mark Zuckerberg, Bill Gates, Jeff Bezos, Warren Buffet... Pero también la de otros megarricos y de las instituciones con las que tratan de apoderarse del mundo y aniquilar todo intento de reducir su influencia. Sabremos cuánto dinero maneja Black Rock, un fondo buitre de inversión que ha hecho estragos en España y en muchos países del mundo. Y conoceremos datos de otros como el Vanguard Group, JP Morgan Chase, Allianz/PIMCO, el banco UBS, el Bank of America/Merrill Lynch. En cada uno de los capítulos de este ensayo brillante y revelador, Peter Phillips los identifica por su nombre, cuantifica su fortuna, muestra cómo se interconectan sus inversiones. Y explica en qué organizaciones elitistas se encuentran para establecer las reglas que someterán a los países y las empresas, a los ciudadanos de todo el mundo, que se han convertido en piezas impotentes de un ajedrez que ellos mueven a su antojo. La crítica ha dicho... «Esta extraordinaria investigación levanta el velo a través de revelaciones al detalle acerca de la asombrosa concentración de la riqueza privada y del poder de las corporaciones.» Noam Chomsky «Si usted quiere saber quiénes controlan el mundo, lea este libro. Si usted quiere conocer las organizaciones que utilizan y las redes que crean, lea este libro. Si usted quiere saber qué se tiene que hacer para detenerles, lea este libro.» David Cobb, candidato en el 2004 a la presidencia por el Partido verde «Para analizar y mostrar las redes de poder que condicionan nuestras vidas hoy.» La Vanguardia «Un ensayo ciertamente crítico con la situación actual, pues aboga por la urgente necesidad de revertir el orden vigente, en aras de un más equititativo reparto de la riqueza mundial, a fin de evitar las altas concentraciones de capital y beneficio y, lo que es mucho más grave, las enormes bolsas de pobreza que ya padecemos.» Juan Bolea, El Periódico de Aragón «Un ensayo brillante y revelador.» Estación libro

We know that bold innovations are critical in these disruptive and competitive times, but when it comes to breakthrough thinking, we often freeze up. Instead of shooting for a $10-billion payday or a Nobel Prize, the most prolific innovators focus on Big Little Breakthroughs—small creative acts that unlock massive rewards over time. By cultivating daily micro-innovations, individuals and organizations are better equipped to tackle tough challenges and seize transformational opportunities. How did a convicted drug dealer launch and scale a massively successful fitness company? What core mindset drove LEGO to become the largest toy company in the world? How did a Pakistani couple challenge the global athletic shoe industry? What simple habits led Lady Gaga, Banksy, and Lin-Manuel Miranda to their remarkable success? Big Little Breakthroughs isn't just for propeller-head inventors, fancy-pants CEOs, or hoodie-donning tech billionaires. Rather, it's a surpassingly simple system to help everyday people become everyday innovators.

alex karp business partners: Ship of Fools Tucker Carlson, 2019-10-01 The #1 New York Times bestseller from FOX News star of Tucker Carlson Tonight offers "a targeted snipe at the Democrats and Republicans and their elite enablers" (New York Journal of Books) in a funny political commentary on how America's ruling class has failed everyday Americans. "Informal and often humorous…an entertainingly told narrative of elite malfeasance" (Publishers Weekly), Tucker Carlson's Ship of Fools tells the truth about the new American elites, a group whose power and wealth has grown beyond imagination even as the rest of the country has withered. The people who run America now barely interact with it. They fly on their own planes, ski on their own mountains, watch sporting events far from the stands in sky boxes. They have total contempt for you. In Ship of Fools, Tucker Carlson offers a blistering critique of our new overlords and answers the all-important question: How do we put the country back on course? Traditional liberals are gone, he writes. The patchouli-scented hand-wringers who worried about whales and defended free speech have been replaced by globalists who hide their hard-edged economic agenda behind the smokescreen of identity politics. They'll outsource your job while lecturing you about transgender bathrooms. Left and right, Carlson says, are no longer meaningful categories in America. "The rift is between those who benefit from the status quo, and those who don't." Our leaders are fools, Carlson concludes, "unaware that they are captains of a sinking ship." But in the signature and witty style that viewers of Tucker Carlson Tonight enjoy so much, Ship of Fools is "bulging with big and interesting ideas, presented succinctly with wit and precision, each chapter a potential book in itself" (The Washington Times).
