a320 air canada business class: **Havayollarında hizmet: konfor, faaliyet ve performans ilişkisinin değerlendirilmesi** Dr. Tüzün Tolga İNAN, 2019-10-20 17 Aralık 1903 tarihinde Wright Kardeşlerin ilk başarılı motorlu uçuş denemesiyle başlayan sivil havacılık tarihi günümüzde dünyanın en büyük endüstrilerinden biri haline gelmiştir. Her ne kadar 2003 yılına kadar ülkemiz için sivil havacılık büyük bir aşama kaydetmese de, 2003 yılından sonra milat niteliğinde gelişmeler gerçekleşmiştir. Doktor ünvanını aldığım halen sivil havacılık alanında lisanslandırmaya sahip tek Üniversite olan Anadolu Üniversitesi ile başlayan sivil havacılık alanında ihtisas veren Üniversite ve Meslek Yüksekokulları, özellikle 2011 yılından itibaren sayıca üst limitlere ulaşmıştır. Ancak unutmamak gerekir ki, havacılık bir nevi aşkla ifa edilmesi gereken bir meslektir. İçerisinde pilotaj, hat ve bakım teknisyenliği, uçuş hareket yöneticiliği (dispeçerlik), uçuş ve misafir kontrol uzmanlığı,

kabin, hareket, yolcu hizmetleri ve kargo memurluğu olmak üzere birçok iş tanımı bulundurmaktadır. Kendim için düşündüğüm zaman bana havacılığı sevdiren kişi babam olmuştur. Özellikle sektörel olarak 30 yılın üzerinde Türk Hava Yolları tecrübesinin bulunması ve beni havacılık alanında doktora yapmaya itmesi kariyerim için en önemli adımlardan bir tanesi oldu. Tabii herşey burada anlatmak istediğim kadar güllük gülistanlık olmamakla birlikte, vardiyalı çalışma düzeni ve yoğun tempo havacılığın olmazsa olmazıdır. Bu nedenle öğrencilere ve bu alanda kariyer yapmak isteyenlere tavsiyem, havacılığın para için yapılacak bir meslek olmadığına bilincinde olmaları gerektiridir. Bu kitabı yayımlama sebeplerimden bir tanesi de kamuoyu tarafından bilinmeyen ya da bilindiği zannedilen bu endüstride hizmet-konfor ve performans parametrelerinin ne olduğunun ve bir havayolu şirketini hangi ölçüde etkilediğini göstermek istememdir. Bu kitap umarım hem akademik hem de sektörel camiada tüm havacılık çalışanlarına ve havacılık sevdalılarına faydalı olacak bir eser olacaktır. Unutmamak gerekir ki burada önemli olan konu 5 yıllık değerler ile 2016 yılında hangi verilerin elde edildiği değil, bu verilerin havacılık şirketleri için öneminin farkına varılması olacaktır.

a320 air canada business class: Low Cost Carriers Lucy Budd, Stephen Ison, 2017-07-05
Low cost carriers (LCCs) represent one of the most exciting and dynamic yet often contentious developments in recent commercial aviation history. Formed as a direct result of policies of airline deregulation and liberalisation that were initiated in the United States in the late 1970s before being implemented in certain European, Australasian, Latin American and other world markets from the mid-1990s onwards to encourage competition, LCCs have been responsible for progressively reconfiguring the spatial patterns, operational practices and passenger experiences of flight. In the process, they have enabled growing numbers of people to fly to more places, more frequently, and at lower cost than had been previously possible. In so doing, however, they have generated a number of socio-economic and environmental challenges. The 23 essays included in this volume provide a detailed insight into the emergence, expansion and evolution of the low cost carrier sector worldwide. The volume covers deregulation and liberalisation of the global airline sector, the business models and operating characteristics of low cost carriers, the changing nature of the airline/airport relationship, LCC network characteristics, issues of pricing and competition and the current impacts and likely future trajectories.
