american express for business credit card: *Brand Premium* N. Hollis, 2017-06-30 Why do consumers pay a premium price for a brand? Is it better quality, the look and feel, or is it the brand's social standing? Author Nigel Hollis believes the answer to all those questions is yes. Yet the vast

majority of brands today trade on past equity and transient buzz. And marketers focus on plan execution rather than creating meaningful differentiation rooted in the brand experience. This lack of meaning is creating a market full of commodities rather than products that instill loyalty. But loyalty (i.e., repeat business) is the key to long term success, and that requires focusing on meaningful differentiation: functional, emotional, or societal. Here, brand expert Nigel Hollis focuses on the four components of a meaningfully different brand: purpose, delivery, resonance, and difference. This unique model will be applied to two very different brand models: premium priced and value priced. The models will show readers how to amplify what their brand stands for across all the brand touch points including: findability, affordability, credibility, vitality, and extendibility. The book will include cases of global brands such as Dyson, Johnnie Walker, Geico, Volkswagen, and more.

american express for business credit card: Credit to the Community Dan Immergluck, 2016-07-08 This book provides the most comprehensive examination of community reinvestment and fair lending problems and policies currently available. It outlines the history of lending discrimination and redlining in U.S. mortgage and small business lending markets, and documents the persistence of such problems today. The author explains the role that government has played in developing banking and credit markets in the United States, from the creation of Alexander Hamilton's First Bank of the United States to the ongoing support government provides through the subsidization of secondary markets and through maintenance of critical regulatory infrastructure. Immergluck takes issue with those calling for deregulation of financial services - especially in the arena of fair lending and consumer protection - and gives new voice to rationales for social contract policies such as the Community Reinvestment Act. He provides new long-term analysis of the failure of federal bank regulators to enforce the CRA, and also shows how increased community activism and media attention have led to sporadic periods of stronger CRA enforcement. Finally, he recommends a number of policy changes that are needed to modernize the nation's fair lending and community reinvestment laws and make them more relevant for the 21st century.
