atlanta business events: Sport, Events, Tourism and Regeneration Nicholas Wise, John Harris, 2017-02-17 Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration. Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if transformations result in exclusion - thus challenging who

regeneration is for. This book will be valuable reading for students and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.

atlanta business events: Mega-event Cities: Urban Legacies of Global Sports Events Valerie Viehoff, Gavin Poynter, 2016-03-02 Mega-events represent an important moment in the life of a city, providing a useful lens through which we may analyse their cultural, social, political and economic development. In the wake of the International Olympic Committee's (IOC's) concerns about 'gigantism' and wider public concerns about rising costs, it was imperative in the C21st to demonstrate the long term benefits that arose for the city and nations from hosting premier sporting events. 'London 2012' was the first to integrate the concept of legacy from the moment a bid to host the Olympic and Paralympic Games was being considered. London proposed an ambitious programme of urban renewal for East London. Subsequent host city bids have adopted the 'legacy narrative' and, as this book demonstrates, aligned this to major schemes of urban development and renewal. Bringing together scholars, practitioners and policy makers, this book focuses upon the legacies sought by cities that host major sports events. It analyses how governments, the IOC and others define and measure 'legacy'. It also focuses upon the challenges and opportunities facing future host cities of mega-events, looking at their aspirations and the intended impact upon their domestic and international development. It questions what the global shift in geographical location of mega-events means for sports development and the business of sport, what the attractions are for cities seeking to harness the hosting of a mega-event, and whether there may be longer term consequences for the bidding and hosting major sporting events in the wake of the widespread social unrest that accompanied the preparations in Brazil for hosting the FIFA World Cup (2014) and the summer Olympics (2016) and in Turkey, where there was significant opposition to bid for the 2020 summer Olympiad.
