## **Program Overview**

The Bachelor of Business in Management is designed to provide students with a comprehensive understanding of business operations and management theories. Typically spanning three to four years, this degree combines theoretical knowledge with practical experience. Students engage in a mix of lectures, group projects, and case studies, which foster teamwork and problem-solving abilities. Many programs also offer internships or cooperative education opportunities, allowing students to gain hands-on experience in the field.

Moreover, the program structure often includes electives that enable students to tailor their education according to their interests. These electives may cover specialized areas such as human resource management, marketing, finance, and entrepreneurship, allowing for a customized academic journey that aligns with individual career aspirations.

## **Core Curriculum**

The core curriculum of a Bachelor of Business in Management typically encompasses a broad range of subjects that are integral to understanding business dynamics. Common subjects include:

- Principles of Management
- Organizational Behavior
- Marketing Management
- Financial Management
- Operations Management
- Business Law and Ethics
- Strategic Management
- Economics for Managers

Each of these subjects contributes to a well-rounded education, ensuring that students grasp the essential functions of management within a business context. The curriculum is often designed to be progressive, starting with fundamental concepts and advancing toward more complex management theories and practices.

## Skills Acquired

Students pursuing a Bachelor of Business in Management develop a diverse skill set that is highly valued in the business world. Key skills include:

- **Leadership:** Graduates learn how to inspire and lead teams, fostering a productive work environment.
- **Communication:** Effective verbal and written communication skills are emphasized, vital for conveying ideas clearly and persuasively.
- **Analytical Thinking:** Students hone their ability to analyze data and make informed decisions based on quantitative and qualitative information.
- **Problem-Solving:** The program encourages critical thinking and the ability to solve complex business challenges.
- **Project Management:** Graduates gain skills in planning, executing, and overseeing projects to achieve organizational goals.

These skills not only enhance employability but also prepare graduates for leadership roles in various sectors, including corporate, nonprofit, and government organizations.
