With the mass movement of people now commonplace, the role of female entrepreneurs in immigrant communities has become an increasingly important component of the world economy, its productivity, and the struggle against poverty. Throwing light on the dynamics of entrepreneurship generally, and on immigrant and female entrepreneurship in particular, the global Female Immigrant Entrepreneurship (FIE) project is a huge and exciting research undertaking. Written by the project's team of researchers based in prestigious business schools and universities on almost every continent, this important book begins the process of discovering why and how female driven business start-ups often seem to spontaneously emerge in adverse environments. Is it randomness, luck, or chance that determine success or failure, or vital critical forces and the inherent qualities of the women involved? The research emerging from the FIE project points to answers to questions about the integration of immigrant communities, their interaction with host economic and business environments, and the role of women in that interaction. With findings from more than fifteen countries, from the USA with some of the world's oldest and largest immigrant communities, to African countries that are the newest destination for Asian migrants, this book will help inform social and economic policy in communities and countries searching for prosperity. More than that, the book offers policy makers, business leaders, and those concerned with business development the chance to uncover some of the mystery around the complex phenomenon of entrepreneurship itself.

bachelor in fashion business: New Business Models for Sustainable Fashion Miguel Angel Gardetti, Esben Rahbek Gjerdrum Pedersen, 2022-02-13 The fashion industry has not traditionally

been associated with definitions of sustainable development and sustainability. The social and environmental challenges faced by the fashion industry concern the entire supply and demand chain, propped up by a throwaway consumer culture. In response to these sustainability challenges, some fashion companies have developed innovative social and environmental initiatives. While many of these initiatives are sympathetic, resourceful and hold real potential for generating social and environmental improvements, greater scale and scope is needed in order to bring about a more fundamental shift in current practices. This Special Issue of the Journal of Corporate Citizenship explores how sustainability can be a driver for exploring new business models within a single industrial setting, highlighting some of the sustainability initiatives that bring hope for a more sustainable future. New Business Models for Sustainable Fashion is a must-read for researchers and practitioners tackling the challenges of an industry in need of large-scale transformation.
