The number of small independent breweries throughout the UK is now at over 2,000, with more opening every month. This handbook guides you through the practicalities of starting your own

microbrewery; from how to brew, through to finding a place of your own.

**aspen business park:** *The MicroDistillers' Handbook Volume 2* Gavin D Smith, 2020-09-28 Artisan and micro distilling continue on an upward trajectory. In 2018 the UK had 205 distilleries, but that figure has now risen to 246 after a further 41 opened in 2019. The number of distilleries in the UK has now grown year on year since 2011, when there were just 110 distillers in the country. Consumers are now willing to pay for authentic smaller brands was said to have driven demand for 'craft' spirits, which has led to the increase in distillery numbers, "increasing popularity of flavoured spirits" being a major driver, with new brands creating flavoured expressions such as lemon sherbet, pear drop and Parma Violet. Gin sales in 2019 were recorded at over £1 billion. The growth in British craft distilling has not stopped yet. Whilst gin sales growth is beginning to taper off, new distillers are still entering the market and M&A (mergers and acquisitions) deals are being completed. "The trend for authentic local artisan food and drink looks to be here to stay, and that will continue to tempt entrepreneurs and investors into the craft spirits industry. "While artisan gin has been the big growth driver over the last five years, there is also strong interest in some of the smaller artisan whisky distillers in Scotland."

**aspen business park: The Aspen Institute Guide to Socially Responsible MBA Programs: 2008-2009** The Aspen Institute, 2008-06-23 The Aspen Institute, a premier non-profit, research organization for corporate social responsibility, offers the first comprehensive guide to the world's leading global MBA programs in CSR—an indispensable guide for prospective students, universities, hiring companies, and libraries. This guide provides an overview of how global MBA programs bring social impact management into their curricular and extracurricular programs. Social impact management, which includes environmental, ethical, and corporate governance issues, is the field of inquiry at the intersection of business needs and wider societal concerns that reflects their complex interdependency. Without an understanding of this interdependency, neither business nor the society in which it operates can thrive. Each year business schools from around the world strive to differentiate themselves and attract the best and the brightest future business leaders, while prospective MBAs are looking for a program that will provide effective management skills to succeed in the changing face of business. The bottom line is no longer exclusively dedicated to financial returns. Rather, business leaders must also consider the environmental and social impacts of their decisions in order to compete in today's marketplace. The MBA schools that participate in the Aspen Institute's survey, and are therefore highlighted in the Aspen Institute Guide for Socially Responsible MBA Programs: 2008-2009, are leaders in integrating these issues into their MBA curricula.
