best business master degrees: Finding the Best Business School for You Everette E. Dennis, 2006 Every year, more than 250,000 people take the Graduate Management Administration Test (GMAT) in preparation for applying to MBA programs. While many will seek admission to the top-ranked schools, only a small percentage will end up at one of these elite programs. Everette Dennis and Sharon Smith argue that those who think only in these narrow terms, assuming that only the best warrant their consideration, are shortchanging themselves in at least two ways: they may miss the mark and decide to forgo an MBA altogether, or they may look past the best programs for themselves. Ultimately, finding the best and most appropriate business school requires more than following trends and assessing rankings. Dennis and Smith offer an approach that is designed to help prospective MBA students cast the net more widely, thinking more expansively, creatively, and strategically, with both short- and long-term implications in mind. Discussing the pros and cons of a formal business education (in the context of evolving attitudes toward management and the role of the MBA in developing successful leaders), the authors help readers identify their underlying motivations for pursuing an MBA, learn how to read between the lines of the popular rankings, and utilize the concept of return on investment (ROI) to evaluate programs on the basis of their contribution to long-term professional and personal goals. At a time when one-fourth of all master's degrees conferred are in business, *Finding the Best Business School for You* offers practical insights for making wise decisions and getting the most out of the MBA experience.

Especially relevant to aspiring managers seeking to learn more about business, serious questions are asked about management education and its provision. Providing an exposé on (and denunciation of) managerial fallacies, management failures, academic treachery, and greed, the author directly addresses the need for professional managers, to cope with the challenges on this planet to come. With a deep historical knowledge, breadth of vision and equally intellectually daring insight, the author offers the keys not only to an understanding of how we have reached our current position, but more importantly, how we might progress from here. This book sets the tone and heralds the need for real, practical, decisive change, leading to a more ethical, sustainable future.
