boeing 737 800 copa business class: The Airline Revolution Gordon Mills, 2016-07-15

When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the new-airline scene. The Airline Revolution will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments.

boeing 737 800 copa business class: Transforming Airlines Nawal K. Taneja, 2020-03-19

This book provides a flight plan for riding the impending connectivity transformation curve. It takes the perspective of actionability, highlighting initiatives that executives in airlines and related businesses can use from the insights of multi-industry executives. The emphasis is on execution, not on the concepts themselves. There is a cluster of at least four distinct megatrends that may converge to form disruptive conditions: (1) elevated expectations of existing and new customer segmentations, those who expect available and accessible air mass transportation systems, and those who expect connected services and seamless travel on different modes of transportation; (2) new emerging technology, incorporated in the air and ground vehicles, that will create new opportunities for existing and new service providers to offer new value propositions; (3) platforms developed around the ecosystem of customers; and (4) the impact on travel that the fast-changing demographic and economic characteristics of two major countries: India and China. These megatrends could lead existing or new businesses to create value propositions specifically dedicated to the new segments once each reaches a critical mass. Drawing on the author's own experience in the airline industry and related businesses, this book discusses the how, relating to reimagining the business, re-entrepreneurship of the organization, innovating through partnerships, reengaging with customers and employees, and rebranding the business in response to these trends. This book is recommended reading for all senior-level practitioners of airlines and related businesses worldwide.

boeing 737 800 copa business class: Flap Internacional Ed. 599 Grupo Editorial Spagat , 2023-01-13 Desde os anos 1980 eu aguardo com ansiedade a chegada da edição especial da Flap que retrata, de forma abrangente, a aviação comercial. Este verdadeiro anuário é item de colecionador. Conheço muita gente que tem em suas bibliotecas a coleção completa dessas edições. Nunca imaginei que um dia, além de colaborar na execução desses registros anuais e históricos do setor como fiz em várias edições anteriores, teria a responsabilidade de publicar a revista e carregar o peso de garantir a precisão e a qualidade desta edição em particular. Mas, é claro, ninguém faz nada sozinho. E como piloto dessa grande aeronave chamada Flap Internacional, eu tenho uma tripulação de Primeira Classe. No time editorial, Flávio Marcos de Souza, Rodrigo Cozzato, Paulo Marques e agora nosso querido Lineu Carneiro Saraiva, convidado especialmente trazido para escrever esta edição, fizeram o trabalho com dedicação, precisão histórica e infatigável esforço para cruzar dados, fatos e informações.
