best business online colleges: Our Cherished Halls of Ivy Phillip L. Beukema, 2022-10-10 Higher education has both supporters and detractors, although not in equal numbers. Some would have us believe that our higher education enterprise is on the brink of disaster, that it's falling apart at the seams. Some go so far as to call the system broken beyond repair, suggesting that it be rebuilt

from the ground up. Can it be this bad? Drawing on his long experience in higher ed administration, the author examines the sea change that's affected nearly every corner of the higher learning landscape. These corners include the high-and-rising costs of tuition, the crushing levels of student debt, the shamefully low graduation rates in too many schools, the growing "million-dollar clubs" whose members include university presidents and football and basketball coaches, the inadequacies of accreditation, and the growing influence of partisan politics in the conduct of our public universities. That's for starters. With an insider's perspective, the author paints a picture that is up-front and honest, laying bare the depth and extent of specific problems confronting that crucial engine of our economy - higher education. In each case, he spells out what needs a tune-up and what needs something closer to an overhaul. Of course, he offers specific proposals for 'fixing' those problems. They're likely to be controversial, but the author hopes they spark a debate that ultimately leads to productive solutions.

best business online colleges: *The Oxford Handbook of Management* Adrian Wilkinson, Steven J Armstrong, Michael Lounsbury, 2017-03-01 Management, the pursuit of objectives through

the organization and co-ordination of people, has been and is a core feature-and function-of modern society. Some 'classic' forms of corporate and bureaucratic management may be seen as the prevalent form of organization and organizing in the 20th century, but in the post-Fordist, global, knowledge-driven contemporary world we are seeing different patterns, principles, and styles of management as old models are questioned. The functions, ideologies, practices, and theories of management have changed over time, as recorded by many scholars, and may vary according to different models of organization, and between different cultures and societies. Whilst the administrative, corporate, or factory manager may be a figure on the wane, management as an ethos, organizing principle, culture, and field of academic teaching and research has increased dramatically in the last half century, and spread throughout the world. The purpose of this Handbook is to analyse and explore the evolution of management; the core functions and how they may have changed; its position in the culture/zeitgeist of modern society; the institutions and ideologies that support it; and likely challenges and changes in the future. This book looks at what management is, and how this may change over time. It provides an overview of management - its history, development, context, changing function in organization and society, key elements and functions, and contemporary and future challenges.

best business online colleges: Online Teaching at Its Best Linda B. Nilson, Ludwika A. Goodson, 2017-11-08 Bring pedagogy and cognitive science to online learning environments Online Teaching at Its Best: A Merger of Instructional Design with Teaching and Learning Research is the scholarly resource for online learning that faculty, instructional designers, and administrators have long been awaiting. Over 70 percent of degree-granting institutions offer online classes, and while technical resources abound, the courses often fall short of integrating the best practices in online pedagogy, even if they comply with online course design standards. Typically these standards omit the best practices in teaching and learning and the principles from cognitive science, leaving students struggling to keep the pace, understand the material, and fulfill their true potential as learners. This book fills the gap, providing evidence-based practices for online teaching, online course design, and online student motivation integrated with pedagogical and cognitive science to help you build the distance learning courses and programs your students deserve. As more and more students opt for distance learning, it's up to designers and instructors to rethink traditional methods and learn to work more effectively within the online learning environment, and up to administrators to provide the needed leadership. Online Teaching at Its Best provides practical, real-world advice grounded in educational science to help online instructors, instructional designers, and administrators deliver an exceptional learning experience. Adopt new pedagogical techniques designed specifically for online learning environments Ensure strong course alignment and effective student learning for online classes Increase student retention, build necessary support structures, and train faculty more effectively Integrate research-based course design and cognitive psychology into graduate or undergraduate programs Distance is no barrier to a great education; what do stand in the way are inadequate online course design and implementation and deficient faculty training and support—all of which administrators can mitigate. Online Teaching at Its Best will help you ensure that your online classes measure up to the rigor and quality of excellence in teaching and assessment, build in the personal touch for developing a learning community and equip your students to succeed in the next challenge.
