What is an NFC Business Card?

An NFC business card is a digital card embedded with NFC technology that allows users to share contact details, social media profiles, and other information wirelessly. When someone taps their smartphone against the card, it triggers an action that can lead to a website, a vCard, or an app. Unlike traditional business cards, NFC cards can store a wealth of information and can be updated remotely, making them a versatile choice for professionals.

How NFC Technology Works

NFC technology operates on the principle of electromagnetic fields to enable communication between devices in close proximity.
