bmo business checking: *Advances in Enterprise Engineering III* Antonia Albani, Jan Dietz, 2009-06-04 In the era of continuous changes in internal organizational settings and external business environments – such as new regulations and business opportunities – modern enterprises are subject to extensive research and study. For the understanding, design, and engineering of modern enterprises and their complex business processes, the discipline of enterprise engineering requires sound engineering principles and systematic approaches based on rigorous theories. Along with that, a paradigm shift seems to be needed for addressing these issues adequately. The main paradigm shift is the consideration of an enterprise and its business processes as a social system. In its social setting, an enterprise and its business processes represent actors with certain authorities and assigned roles, who assume certain responsibilities in order to provide a service to its environment. Second to that, a paradigm shift is to look at an enterprise as an artifact purposefully designed for a certain mission and goal. The need for this paradigm shift, along with the complexity and agility of modern enterprises, gives inspiration for the emerging discipline of enterprise engineering that requires development of new theories and methodologies. To this end, the prominent methods and tools of modeling and simulation play a significant role. Both (conceptual) modeling and simulation are widely used for understanding, analyzing, and engineering an enterprise (its organization and business processes).

bmo business checking: *Landmark Cases in Privacy Law* Paul Wragg, Peter Coe, 2023-02-23

This new addition to Hart's acclaimed Landmark Cases series is a diverse and engaging edited collection bringing together eminent commentators from the United Kingdom, the United States, Australia, Canada, and New Zealand, to analyse cases of enduring significance to privacy law. The book tackles the conceptual nature of privacy in its various guises, from data protection, to misuse of private information, and intrusion into seclusion. It explores the practical issues arising from questions about the threshold of actionability, the function of remedies, and the nature of damages. The cases selected are predominantly English but include cases from the United States (because of the formative influence of United States' privacy jurisprudence on the development of privacy law), Australia, Canada, the Court of Justice of the European Union, and the European Court of Human Rights. Each chapter considers the reception and application (and, in some instances, rejection) outside of the jurisdiction where the case was decided.

bmo business checking: *Precision Marketing* Jeff Zabin, Gresh Brebach, 2004-02-06 Today,

the pressure to demonstrate Marketing ROI has never been greater, and many companies are taking a more scientific approach to marketing, and treating it as a true business discipline. This means applying more rigor to capturing, analyzing and manipulating customer data, and delivering narrowly-defined messages designed to resonate with customers' specific wants and needs. This process is called precision marketing. Based on extensive research and their own experience working with some of the world's largest and most progressive marketing organizations, Jeff Zabin and co-author Gresh Brebach show how precision marketing can yield enormous business value. Writing in an engaging style that touches on everything from Renaissance thinking to Minority Report, they provide a definitive roadmap for combining precision marketing with mass marketing to cut costs, grow revenues, and create an overall competitive advantage.

bmo business checking: The Hyena Woman Chronicles Teejay LeCapois, 2016-08-15 As Salaam Alaikum. My name is Amina Jeannette Baffour. I was born in the City of Ottawa, Ontario, to a Ghanaian Muslim father and a white Canadian mother. Growing up, I always felt out of place, but not for the reason some might think. During a trip to the City of Accra, Ghana, I met my paternal grandmother Fatoumatta Baffour. The old lady taught me the truth about myself, which I've long suspected. I am more than human. My clan is descended from Were-Hyenas, Supernatural entities that roamed West Africa and the Middle East in ancient times and acted as intermediaries between the World of Man and the great Realms of the Supernatural. I am discovering my unique powers while running from various foes, Mortal and Inhuman alike, who want me dead. Wish me luck, folks. I think I am definitely going to need it.
