business analyst intern amazon: Recruitment Advertising as an Instrument of Employer Branding Jolanta Łacka-Badura, 2015-10-05 The book offers a linguistic analysis of job advertising as an instrument of employer branding, investigating how the creation of the employer brand and the projection of employee value proposition are realised linguistically in a corpus of online job advertisements. The study is methodologically grounded in the current approaches to discourse analysis and business/organisational communication, as it is broadly understood, with particular emphasis on genre and register analysis, the language of persuasion and evaluation, as well as the language of (organisational) values. The analysis conducted in the book demonstrates that job advertisements constitute a distinct promotional business genre, a member of the system of genres applied in the job search context, increasingly resembling multi-modal marketing-type ads. The rhetorical structure of online recruitment advertisements confirms the initial hypothesis that job ads contribute to the projection and reinforcement of employer brands. The register of recruitment ads clearly harmonises with the employer branding function of the genre: extremely positive, encompassing a wide range of persuasive strategies, as well as lexico-grammatical choices contributing to the creation of employer brands, job advertising may justifiably be classified as a "paradigm case" of persuasion. With employer branding being deeply rooted in the values emanating from an organisation, the use of linguistic structures communicating or implying the system of attributes and values declared by the employing organisations is a powerful employer branding strategy, widely reflected in the corpus. Taking into account the interdisciplinary character of the analysis, the book will be of interest not only to linguists and business communication scholars, but also to human resource management and public relations researchers and practitioners.

Unlike the talking heads that populate the financial news channels, Faber is a down-and-dirty investigative reporter. For six years, on CNBC's popular Squawk Box and in his own segments, Faber has broken story after story. Each day over one million people tune in to hear his daily report. Those who know the score know that Faber is the one to listen to -- especially now that the market isn't doing as well as it used to. Now Faber has written the smartest, most innovative investment book to be published in years. Like Harvard Business School's famous case study method, each chapter is built around a story -- the story of how a stock was presented to the public. Then Faber extracts clear, easy-to-follow lessons and instructions on how readers can learn the stocks real story, just as he does everyday on CNBC. Readers learn not just how to pick the stocks they want to invest in, but how to avoid joining the penguins lining up for

big losses. The Faber Report combines practical, down to earth investment advice with wild accounts of investor fraud, company misdeeds, and famous investors and banks that have led investors astray. A quantum leap beyond the usual investment books, The Faber Report is essential reading for anyone who wants to profit-bulls or bears.

business analyst intern amazon: The Quest for the Sustainable Development Goals

Thiago Gehre Galvao, Henrique Zeferino de Menezes, 2024-08-22 The book presents the experiences, complexities, and contradictions of the implementation of the Sustainable Development Goals in Brazil so far. Through chapters from a variety of stakeholders, the book examines national, regional, and local aspects of development in Brazil. The chapters here draw from scientific knowledge and practical experience to take a critical look at what the SDGs mean in a Global South country and what the implications of this are for global development. The book is divided into three sections. The first section addresses the critical political and institutional aspects related to the implementation of the Sustainable Development Goals in Brazil, highlighting advances as well as pitfalls and setbacks. The chapters look at broad questions related to the role of civil society in defining political priorities and strategies to move forward with the SDGs as well as issues involved in incorporating the SDGs at different levels of government and other institutions. The chapters in this section critically address the political and institutional advances as well as barriers to the progress of the SDGs in Brazil. The second section directly addresses progress made toward the SDGs in the context of the political, economic and social variables specific to Brazil. The chapters address critical shortcomings and demands for Brazilian society: the need for improvements in education and employment policies to reduce poverty, the urgent need to increase gender equality and reduce violence, as well as the imperative to strengthen institutions and policies to mitigate climate change and protect the environment. The final section focuses on critically assessing the 2030 Agenda itself and drawing from a Global South IR perspective. The chapters here dialog with decolonial and post-developmental perspectives to highlight problems with the agenda and lift up sidelined priorities, presenting yet-unexamined policy solutions and innovations that are currently absent from the global institutional agenda. The Brazilian case is a perfect illustration of how underdevelopment and political instability can constrain the paths to sustainable development, while at the same time social innovations, leverages based on regional dynamics, and strength from social and cultural diversity can drive sustained progress.
