business accounts with navy federal: BUSINESS ORGANISATION AND BUSINESS SECTOR (FYBA Commerce) (Semester I & II) Dr. Kshamali Sontakke, 2025-03-22 INTRODUCTION In today's interconnected world, business, trade, and industry are the foundational pillars that drive the global economy. Though distinct, these three areas are deeply intertwined, collectively fueling economic growth, innovation, and job creation worldwide. To fully understand the modern economy, it is crucial to recognize the unique characteristics of each concept and how they interact. Business refers to any organization involved in commercial, industrial, or professional activities aimed at producing goods or offering services to meet customer needs and generate profit. These entities range from small, independently owned businesses to large, multinational corporations. The primary goal of any business is to create value, whether through physical products, services, or innovative solutions to emerging demands. Businesses operate in various sectors like retail, finance, manufacturing, technology, and hospitality, varying in scale and complexity. Critical functions such as marketing, finance, operations, human resources, and customer service work together to ensure smooth operations and achievement of goals. While profit generation is often a primary objective, many businesses also prioritize social responsibility, sustainability, and long-term growth. By providing goods, services, or a combination of both, businesses contribute to economic progress, job creation, tax revenue, and technological advancements.
