provides an optimistic and engaging look at the current entrepreneurial comeback happening in the Midwest, documenting its transformation from Rust Belt to Tech Belt. The American Midwest was once a proud bastion of good-paying jobs and middle-class life. Recently it has come to evoke bleakness: job loss, opiate addiction, despair. But without fanfare, a pivotal movement has grown, quietly transforming the heartland into a high-tech hub. In *Silicon Heartland*, tech journalist Rebecca A. Fannin returns to her hometown region to report on how tech ecosystems—of entrepreneurial talent, venture capital, accelerators, incubators, universities, and R&D—are retooling midsized heartland cities and Appalachian towns. brad d smith center for business and innovation: American Defense Reform Dave Oliver, Anand Toprani, 2022-12-01 A roadmap for US military innovation based on the Navy's history of success through civilian-military collaborations The US military must continually adapt to evolving technologies, shifting adversaries, and a changing social environment for its personnel. In *American Defense Reform*, Dave Oliver and Anand Toprani use US naval history as a guide for leading successful change in the Pentagon. *American Defense Reform* provides a historical analysis of the

Navy during four key periods of disruptive transformation: the 1940s Revolt of the Admirals, the McNamara Revolution in systems analysis, the fallout from the Vietnam War, and the end of the Cold War. The authors draw insights from historical documents, previously unpublished interviews from four-star admirals, and Oliver's own experiences as a senior naval officer and defense industry executive. They show that Congress alone cannot effectively create change and reveal barriers to applying the experience of the private sector to the public sector. Ultimately, Oliver and Toprani show that change can only come from a collaborative effort between civilians, the military, and industry, each making vital contributions. *American Defense Reform* provides insights and practical recommendations essential to reforming national defense to meet future demands.

Providing a rich tapestry of examples, anecdotes, and lessons that place design thinking in perspective, *Transform with Design* is for innovators interested in learning how design has transformed organizations while also gaining a current perspective on what others are doing in their field.

brad d smith center for business and innovation: *How Covid Crashed the System* David B. Nash, Charles Wohlforth, 2022-10-31 Why America's health care system failed so tragically during the Covid pandemic, and how the forces unleashed by the crisis could be just the medicine for its long-term cure. Covid patients overwhelmed American hospitals. The world's most advanced and expensive health care system crumbled, short of supplies and personnel. The U.S. lost more patients than any other nation during the pandemic. How could this happen? And how could this disaster lead to a more resilient, rational and equitable health care system in the future? *How Covid Crashed the System* answers these questions with compelling stories and wide-angle analysis. Dr.

David Nash, a founder of the discipline of population health, and Charles Wohlforth, an award-winning science writer, pick up the pieces of the Covid disaster like investigators of a crashed airliner, finding the root causes of America's failure to cope, and delivering surprising answers that may reorient how you think about your own health. From the broadest, cultural flaws that disabled our health system to particular, institutional issues, America's defenses fell due to racism and poverty, combined with a culture of misguided individualism that tore communities apart. We suffered from failed leadership and crippled public health agencies, and hospitals built to make money from services, not deliver health. But *How Covid Crashed the System* goes beyond analyzing those problems, providing hope for change and fundamental improvement in ways that will transform Americans' health. Covid's market disruption encouraged new technology that allows for remote health care. Integrated health organizations gained ground, working to manage clients' total wellness from cradle to grave. Covid also accelerated changes in medical education, to make doctor training more equitable and better aligned to the skills we need. And Covid forced employers to accept responsibility for their workers' health in a new way, making them partners in this new movement. Using systemic analysis of the Covid crash, the authors find reasons to hope. America's health care establishment resisted reform for decades, mired in waste and avoidable errors. Now, the pandemic crisis has exposed its flaws for all to see, creating the opportunities for systemic changes. Even without new laws or government policies, America is moving toward a transformed health system responsible for our wellness. *How Covid Crashed the System* tells that story.

brad d smith center for business and innovation: The Transformation of American Health Insurance Troyen A. Brennan, 2024-07-30 Can American health insurance survive? In *The Transformation of American Health Insurance*, Troyen A. Brennan traces the historical evolution of public and private health insurance in the United States from the first Blue Cross plans in the late 1930s to reforms under the Biden administration. In analyzing this evolution, he finds long-term trends that form the basis for his central argument: that employer-sponsored insurance is becoming unsustainably expensive, and Medicare for All will emerge as the sole source of health insurance over the next two decades. After thirty years of leadership in health care and academia, Brennan argues that Medicare for All could act as a single-payer program or become a government-regulated program of competing health plans, like today's Medicare Advantage. The choice between these two options will depend on how private insurers adapt and behave in today's changing health policy environment. This critical evolution in the system of financing health care is important to employers, health insurance executives, government officials, and health care providers who are grappling with difficult strategic choices. It is equally important to all Americans as they face an inscrutable health insurance system and wonder what the future might hold for them regarding affordable coverage.

brad d smith center for business and innovation: Disrupting D.C. Katie J. Wells, Kafui Attoh, Declan Cullen, 2025-10-28 A panoramic account of the urban politics and deep social divisions that gave rise to Uber The first city to fight back against Uber, Washington, D.C., was also the first city where such resistance was defeated. It was here that the company created a playbook for how to deal with intransigent regulators and to win in the realm of local politics. The city already serves as the nation's capital. Now, D.C. is also the blueprint for how Uber conquered cities around the world—and explains why so many embraced the company with open arms. Drawing on interviews with gig workers, policymakers, Uber lobbyists, and community organizers, *Disrupting D.C.*

demonstrates that many share the blame for lowering the nation's hopes and dreams for what its cities could be. In a sea of broken transit, underemployment, and racial polarization, Uber offered a lifeline. But at what cost? This is not the story of one company and one city. Instead, *Disrupting D.C.* offers a 360-degree view of an urban America in crisis. Uber arrived promising a new future for workers, residents, policymakers, and others. Ultimately, Uber's success and growth was never a sign of urban strength or innovation but a sign of urban weakness and low expectations about what city politics can achieve. Understanding why Uber rose reveals just how far the rest of us have fallen.
