brutal business first 48: Listening for Democracy Andrew Dobson, 2014 Although much prized in daily conversation, good listening has been almost completely ignored in that form of political conversation we know as democracy. This book examines the reasons why so little attention has been paid to the listening aspect of democratic conversation, explores the role that listening might play in democracy, and outlines some institutional changes that could be made to make listening more central to democratic processes. The focus on listening amounts to a reorientation of democratic theory and practice, providing novel perspectives on enduring themes in democracy such as recognition, representation, power and legitimacy—as well as some new ones, such as silence. Eschewing the pessimism of the 'realist' turn in democratic theory, the book shows how attention to listening can breathe life into the democratic project and help us to realise some of its objectives. Drawing on practical examples and multidisciplinary sources, the book shows how listening should be at the heart of representative and deliberative democracy rather than peripheral to them. It develops a notion of dialogic democracy based on structured, 'apophatic', listening, and meets the challenge of showing how this could be incorporated in parliamentary democracies. What should we be listening out for? This book addresses the question of political noise and uses the idea of recognition to develop an account of politics that takes us beyond the Aristotelian speaking being towards a Deweyan notion of the 'event' around which publics coalesce.

brutal business first 48: Soul, Self, and Society Edward L. Rubin, 2015-02-17 Political and social commentators regularly bemoan the decline of morality in the modern world. They claim that the norms and values that held society together in the past are rapidly eroding, to be replaced by permissiveness and empty hedonism. But as Edward Rubin demonstrates in this powerful account of moral transformations, these prophets of doom are missing the point. Morality is not diminishing; instead, a new morality, centered on an ethos of human self-fulfillment, is arising to replace the old one. As Rubin explains, changes in morality have gone hand in hand with changes in the prevailing mode of governance throughout the course of Western history. During the Early Middle Ages, a moral system based on honor gradually developed. In a dangerous world where state power was declining, people relied on bonds of personal loyalty that were secured by generosity to their followers and violence against their enemies. That moral order, exemplified in the early feudal system and in sagas like *The Song of Roland*, *The Song of the Cid*, and the Arthurian legends has faded, but its remnants exist today in criminal organizations like the Mafia and in the rap music of the urban ghettos. When state power began to revive in the High Middle Ages through the efforts of the European monarchies, and Christianity became more institutionally effective and more

spiritually intense, a new morality emerged. Described by Rubin as the morality of higher purposes, it demanded that people devote their personal efforts to achieving salvation and their social efforts to serving the emerging nation-states. It insisted on social hierarchy, confined women to subordinate roles, restricted sex to procreation, centered child-rearing on moral inculcation, and countenanced slavery and the marriage of pre-teenage girls to older men. Our modern era, which began in the late 18th century, has seen the gradual erosion of this morality of higher purposes and the rise of a new morality of self-fulfillment, one that encourages individuals to pursue the most meaningful and rewarding life-path. Far from being permissive or a moral abdication, it demands that people respect each other's choices, that sex be mutually enjoyable, that public positions be allocated according to merit, and that society provide all its members with their minimum needs so that they have the opportunity to fulfill themselves. Where people once served the state, the state now functions to serve the people. The clash between this ascending morality and the declining morality of higher purposes is the primary driver of contemporary political and cultural conflict. A sweeping, big-idea book in the vein of Francis Fukuyama's *The End of History*, Charles Taylor's *The Secular Age*, and Richard Sennett's *The Fall of Public Man*, Edward Rubin's new volume promises to reshape our understanding of morality, its relationship to government, and its role in shaping the emerging world of High Modernity.

brutal business first 48: *A Spectacular Secret* Jacqueline Goldsby, 2020-09-15 This incisive study takes on one of the grimmest secrets in America's national life—the history of lynching and, more generally, the public punishment of African Americans. Jacqueline Goldsby shows that lynching cannot be explained away as a phenomenon peculiar to the South or as the perverse culmination of racist politics. Rather, lynching—a highly visible form of social violence that has historically been shrouded in secrecy—was in fact a fundamental part of the national consciousness whose cultural logic played a pivotal role in the making of American modernity. To pursue this argument, Goldsby traces lynching's history by taking up select mob murders and studying them together with key literary works. She focuses on three prominent authors—Ida B. Wells-Barnett, Stephen Crane, and James Weldon Johnson—and shows how their own encounters with lynching influenced their analyses of it. She also examines a recently assembled archive of evidence—lynching photographs—to show how photography structured the nation's perception of lynching violence before World War I. Finally, Goldsby considers the way lynching persisted into the twentieth century, discussing the lynching of Emmett Till in 1955 and the ballad-elegies of Gwendolyn Brooks to which his murder gave rise. An empathic and perceptive work, *A Spectacular Secret* will make an important contribution to the study of American history and literature.

brutal business first 48: *The ^ACatonsville Nine* Shawn Francis Peters, 2012-06-29 In the spring of 1968, a group of Catholic antiwar activists barged into a draft board in suburban Baltimore, stole hundreds of Selective Service records, and burned the documents in a fire fueled by homemade napalm. The bold actions of the "Catonsville Nine" quickly became international news, and they remained in the headlines throughout the summer and fall of 1968, when the activists were tried in federal court. Shawn Francis Peters tells the fascinating story of this singular witness for peace and social justice.

brutal business first 48: *Titan* Ron Chernow, 2007-12-18 National Book Critics Circle Award Finalist From the acclaimed, award-winning author of *Alexander Hamilton*: here is the essential, endlessly engrossing biography of John D. Rockefeller, Sr.—the Jekyll-and-Hyde of American capitalism. In the course of his nearly 98 years, Rockefeller was known as both a rapacious robber baron, whose Standard Oil Company rode roughshod over an industry, and a philanthropist who donated money lavishly to universities and medical centers. He was the terror of his competitors, the bogeyman of reformers, the delight of caricaturists—and an utter enigma. Drawing on unprecedented access to Rockefeller's private papers, Chernow reconstructs his subjects' troubled origins (his father was a swindler and a bigamist) and his single-minded pursuit of wealth. But he

also uncovers the profound religiosity that drove him “to give all I could”; his devotion to his father; and the wry sense of humor that made him the country’s most colorful codger. Titan is a magnificent biography—balanced, revelatory, elegantly written.

brutal business first 48: The Logistic Revolution Richard Vahrenkamp, 2012 In The Logistic Revolution, Richard Vahrenkamp discusses the political and economic factors which have led to the rise of logistics in Europe in the context of the mass consumption society. Not only does he show the ascent of truck transport in the 1920s to satisfy consumer needs and the importance of the European motorway infrastructure for the development of modern logistics, he also sheds light on the dimension that freight transport has acquired in Europe and on the organizations that have been created in Europe to enable and facilitate cross border goods transports. Other than in the US, the national transport markets in Europe were initially uncoordinated. It was only in the process of European unification that transport markets for truck freight and associated logistics systems became Europe wide. This change was accompanied by the struggle between rail and truck.

brutal business first 48: Border Politics in a Global Era Kathleen Staudt, 2017-06-16 Initially, research in border studies relied mainly on generalizations from cases in the US-Mexico borderlands before subsequently burgeoning in Europe. Border Politics in a Global Era seeks to expand the study further to include the post-colonial South in response to the major challenge of interdisciplinary border studies: to explore borderlands in many contexts, with and across a variety of states, including the so-called developing, post-colonial states. Culled from decades of firsthand observations of borders from around the world and written with a critical and gender lens, the text is framed with attention to history, geography, and the power of films and travelogues to represent people as “others.” Professor Kathleen Staudt advances border concepts, categories, and theories to focus on trade, migration, and security highlighting the importance of states, their length of time since independence, and border bureaucrats’ discretionary practices. Drawing on her Border Inequalities Database for a global perspective, Staudt calls for reducing inequalities and building institutions in the common grounds of borderlands. The book features maps and other visuals with lists of links at the close of most chapters. Broadly comparative in nature, Border Politics in a Global Era will appeal not only to students of border studies; it will also stimulate attention in comparative politics, international studies, and political geography.

brutal business first 48: Choosing Our Choices James W. Davis, Robert E. DiClerico, 2000-04-26 Probably no feature of the American political system has been subject to more sustained

criticism over the last twenty-five years than the process by which we choose our presidents. In *Choosing Our Choices*, Robert E. DiClerico and James W. Davis debate the question: should we retain the present, primary centered direct democracy method in selecting presidential candidates or should we return to a representative decision-making process to nominate our candidates? This timely and thought-provoking text offers the reader a concise yet comprehensive analysis of the presidential nominating system, arguments for and against the current system, and supplemental documents and essays for further reading. *Choosing Our Choices* will be an invaluable resource for students and scholars interested in exploring how Americans choose their leaders.

brutal business first 48: Promoting Peace, Inciting Violence Jolyon Mitchell, 2013-01-04 This book explores how media and religion combine to play a role in promoting peace and inciting violence. It analyses a wide range of media - from posters, cartoons and stained glass to websites, radio and film - and draws on diverse examples from around the world, including Iran, Rwanda and South Africa. Part One considers how various media forms can contribute to the creation of violent environments: by memorialising past hurts; by instilling fear of the 'other'; by encouraging audiences to fight, to die or to kill neighbours for an apparently greater good. Part Two explores how film can bear witness to past acts of violence, how film-makers can reveal the search for truth, justice and reconciliation, and how new media can become sites for non-violent responses to terrorism and government oppression. To what extent can popular media arts contribute to imagining and building peace, transforming weapons into art, swords into ploughshares? Jolyon Mitchell skillfully combines personal narrative, practical insight and academic analysis.

brutal business first 48: Government for the Public Good Max Rashbrooke, 2018-09-26 In a time of global political ferment, established ideas are coming under renewed scrutiny. Chief among them is one of the dominant notions of our era: that we should entrust markets with many of the tasks previously carried out by government. In this wide-ranging book, Max Rashbrooke goes beyond anecdote and partisanship, delving deep into the latest research about the sweeping changes made to the public services that shape our collective lives. What he unearths is startling: it challenges established thinking on the effectiveness of market-based reforms and charts a new form of 'deep' democracy for the twenty-first century. Refreshing and far-sighted, this stimulating book offers New Zealanders a new way of thinking about government and how it can navigate the turbulent world ahead. The market is often not the solution to our problems. Markets have often been the problem. Max Rashbrooke makes the convincing case for models of government that work better, as well as those to be more wary of. Greater democracy can bring with it greater equality - but, Rashbrooke warns, democracy itself is imperilled by our current levels of inequality. Fast paced, globally informed and wittily written. - Professor Danny Dorling, Oxford University This book provides a wide range of excellent evidence-based arguments that help counter the oft-dominant small-government ideology of our times. Its defence of democracy, government and voter competence is a story that needs to be told more. - Laura O'Connell Rapira, Director of ActionStation
