Kat refused to be a killer and tried to discover the truth behind her existence. Could she be a new form of bio-mechas? Pandora of ancient times opened a box and let all good escape. Would Pandora be the hope the planet needed? Or would she destroy the world? **Shades of Gray Science Fiction Serial Series ** 1. Noir, City Shrouded By Darkness 2. From Moscow, With Love 3. Cerberus Versus Pandora 4. Sisters Enter this dystopian world where corporations rule the people like kings and queens and personal freedom is an unheard-of concept. The Earth is slowly dying as mile-thick clouds known as Dry Clouds prevent the sun from shining down on half the planet. They mysteriously appeared one day and slowly spread across the remaining planet, and if they are not stopped, the Earth is doomed. Many mysteries abound in this apocalyptic science fiction series. Where did the Dry Clouds come from and how can they be stopped? Who is Kat? And who killed Kim's mom? These are just a few of the unanswered questions that start this sci-fi action-adventure series. Prologue: On a parallel Earth, thick puffy barrier cumulus also known as Dry Clouds covered the sky and prevented the glimmer of twilight from shining on the city of Noir. For three decades, the polluted high-troposphere looming clouds covered half the planet and left part of the world to

live in endless night. The mile-thick clouds yielded petroleum-based contaminated water dubbed Tainted Rain and polluted the air, so they were named Dry Clouds for leaving half the planet without drinkable water. At first, scientists believed pollution caused the great cloud barrier but that theory proved to be false. What caused the Dry Clouds to form baffled scientists, and how to reverse them eluded reason, and only technology's constant battle with nature has kept the dark city alive. Man's need for conquest expanded Noir to cover more than half a continent of what would have been called North America, and Noir became a Mega-city. It was the only one in the world. Over the last twenty years, Transgenics and bio-mechas evolved at a breakneck pace. Transgenics were genetically modified organisms with an extra-genome and were mostly plants produced to survive without the sun. Bio-mechas were robots resembling living things. In this world, corporations not governments ruled the people, creating a society where profit set policy and dictated life. Those who resided in Noir were touched by darkness, and the light of goodness seemed a forgotten memory and they... they lived in the gray —Shades of Gray.

business cards places near me: **Windfall** Erika Bolstad, 2023-01-17 Beneath the windswept North Dakota plains, riches await... At first, Erika Bolstad knew only one thing about her great-grandmother, Anna: she was a homesteader on the North Dakota prairies in the early 1900s before her husband committed her to an asylum under mysterious circumstances. As Erika's mother was dying, she revealed more. Their family still owned the mineral rights to Anna's land—and oil companies were interested in the black gold beneath the prairies. Their family, Erika learned, could get rich thanks to the legacy of a woman nearly lost to history. Anna left no letters or journals, and very few photographs of her had survived. But Erika was drawn to the young woman who never walked free of the asylum that imprisoned her. As a journalist well versed in the effects of fossil fuels on climate change, Erika felt the dissonance of what she knew and the barely-acknowledged whisper that had followed her family across the Great Plains for generations: we could be rich. Desperate to learn more about her great-grandmother and the oil industry that changed the face of the American West forever, Erika set out for North Dakota to unearth what she could of the past. What she discovers is a land of boom-and-bust cycles and families trying their best to eke out a living in an unforgiving landscape, bringing to life the ever-present American question: What does it mean to be rich?

business cards places near me: “Mouths on Fire with Songs”. Caroline De Wagter, 2013 This book, the first cross-cultural study of post-1970s anglophone Canadian and American multi-ethnic drama, invites assessment of the thematic and aesthetic contributions of this theater in today's globalized culture. A growing number of playwrights of African, South and East Asian, and First Nations heritage have engaged with manifold socio-political and aesthetic issues in experimental works combining formal features of more classical European dramatic traditions with such elements of ethnic culture as ancestral music and dance, to interrogate the very concepts of theatricality and canonicity. Their “mouths on fire” (August Wilson), these playwrights contest stereotyped notions of authenticity. In-spired by songs of anger, passion, experience, survival, and regeneration, the plays analyzed bespeak a burning desire to break the silence, to heal and empower. Foregrounding questions of hybridity, diaspora, cultural memory, and nation, this comparative study includes discussion of some twenty-five case studies of plays by such authors as M.J. Kang, August Wilson, Suzan-Lori Parks, Djanet Sears, Chay Yew, Padma Viswanathan, Rana Bose, Diane Glancy, and Drew Hayden Taylor. Through its cross-cultural and cross-national prism, “Mouths on Fire with Songs” shows that multi-ethnic drama is one of the most diverse and dynamic sites of cultural production in North America today.
