business class flight to greece: Three Grains of Wheat Mike Papasavas, 2010-11 What would you be willing to give up to discover the world beyond your front door? Three Grains of Wheat chronicles Greek island native Emmanuel Papasavas' journey of self-exploration. It is a journey of more than a few steps as he strips away the chaff of his former life as a wheat farmer's son in pursuit of a dream that leads him away from his family and everything he once knew. Picturesque Agios Isidoros - the small Greek village where plumbing was unheard of and money was a rare commodity - is where author Mike Papasavas began his life (and his memoir) more than sixty-five years ago. As a boy, Papasavas knew little except the ways of a wheat farmer's son. Even so, ingrained in him was a desire to discover something beyond his village, beyond his life as young, naive Emmanuel. This yearning led him into the expansive world beyond where he would discover art, poetry, romance, friendships, and much more - though the quest would cost him his name. When he was twenty years old, Emmanuel - now known as Mike - barely saved enough money to buy a one-way ticket to Germany for the purpose of getting a visa...and a new life. But his journey to freedom is a rocky one, finding him up against several nearly insurmountable complications, homelessness and poverty, Mike learns to tackle each obstacle with humor and hope. For him, often times not knowing where he will sleep tonight, faith is his ultimate compass. Mike's determination paves the road toward adventures and misadventures that will forever change him in this culturally diverse travelogue peppered with entertaining stories, personal reflections, and heart-wrenching

memories.

business class flight to greece: Passion for Excellence Haralampos M. Moutsopoulos, 2025-02-01 This book chronicles the life and career of Haralampos M. Moutsopoulos, an internationally renowned professor of medicine and prolific researcher on Sjögren's syndrome and autoimmune rheumatic diseases. In language that is simple and direct, he takes us on a fascinating journey from the days of his first scientific awakenings at a hospital in his native town of Ioannina, Greece, through his university years in Athens and training in the US, to his eventual return to his homeland. In Greece, he developed two centers of excellence in his field, first at the newly founded University of Ioannina Medical School Department of Internal Medicine and, second, at the Athens University Medical School, Department of Pathophysiology, where he taught until his retirement in 2011. A major theme throughout the book, and especially in this second edition, is his impassioned struggle for excellence, meritocracy, and transparency in universities and in the National Health System in Greece. This battle is relentless especially during critical periods, like the pandemic era, where human life was seriously threatened by the coronavirus and scientific community had to develop and pioneer novel therapeutic approaches and bold administrative solutions. Peppered with both amusing and unsettling incidents from this lifelong crusade to raise professional standards and against misconduct, the book is a must-read for anyone interested in learning about or entering the medical profession as well as for those whose goal is to lead an adventurous, passionate life free from fear, prejudice and mediocrity.
