business first buffalo: *Buffalo's Waterfront Renaissance* Gene Bunnell, 2024-09-01 This book tells the remarkable story of how Buffalo's post-industrial waterfront was reclaimed for public use and enjoyment and pays tribute to the many local citizens and nongovernmental organizations that made the city's waterfront renaissance possible. After years of litigation, public controversy and debate, preservationists and environmentalists ultimately succeeded in persuading the state to abandon its contentious plans for privately developing Buffalo's waterfront. Gene Bunnell, an experienced urban planner, lays out the Buffalo waterfront's long and troubled history, from the torrent of shipping and commercial activity that was unleashed by the opening of the Erie Canal, to the contamination of the Buffalo River due to waterside industries, to how the Outer Harbor—the last portion of the waterfront to be industrially developed—was reshaped and contaminated by filling in low-lying areas with a toxic mix of waste materials. Drawing on interviews and articles, editorials, and op-eds from The Buffalo News, Bunnell provides the reader with a real-time sense of how the struggle over the future of Buffalo's waterfront unfolded and the ultimate victory by local activists to secure environmental cleanup, restored natural habitats, and expanded public waterfront access.

business first buffalo: The Past and Future City Stephanie Meeks, Kevin C. Murphy, 2016-10-04 At its most basic, historic preservation is about keeping old places alive, in active use, and relevant to the needs of communities today. As cities across America experience a remarkable renaissance, and more and more young, diverse families choose to live, work, and play in historic neighborhoods, the promise and potential of using our older and historic buildings to revitalize our cities is stronger than ever. This urban resurgence is a national phenomenon, boosting cities from Cleveland to Buffalo and Portland to Pittsburgh. Experts offer a range of theories on what is driving the return to the city—from the impact of the recent housing crisis to a desire to be socially engaged, live near work, and reduce automobile use. But there's also more to it. Time and again, when asked why they moved to the city, people talk about the desire to live somewhere distinctive, to be some place rather than no place. Often these distinguishing urban landmarks are exciting neighborhoods—Miami boasts its Art Deco district, New Orleans the French Quarter. Sometimes, as in the case of Baltimore's historic rowhouses, the most distinguishing feature is the urban fabric itself. While many aspects of this urban resurgence are a cause for celebration, the changes have also brought to the forefront issues of access, affordable housing, inequality, sustainability, and how we should commemorate difficult history. This book speaks directly to all of these issues. In *The Past and Future City*, Stephanie Meeks, the president of the National Trust for Historic Preservation, describes in detail, and with unique empirical research, the many ways that saving and restoring historic fabric can help a city create thriving neighborhoods, good jobs, and a vibrant economy. She

explains the critical importance of preservation for all our communities, the ways the historic preservation field has evolved to embrace the challenges of the twenty-first century, and the innovative work being done in the preservation space now. This book is for anyone who cares about cities, places, and saving America's diverse stories, in a way that will bring us together and help us better understand our past, present, and future.

The analyses are grounded in Whalen's career of more than three decades, during which he has gleaned insight from institutional and post-Keynesian economics and contributed to national economic policy-making, equitable regional development, and worker engagement in business decisions. The result is a compelling case for reforming capitalism by addressing workers' interests as an integral part of the common good, and for reconstructing economics in the direction of post-Keynesian institutionalism.

business first buffalo: *City Forward* Matt Enstice, Mike Gluck, 2022-07-07 Innovation districts and anchor institutions—like hospitals, universities, and technology hubs—are celebrated for their ability to drive economic growth and employment opportunities. But the benefits often fail to reach the very neighborhoods they are built in. As CEO of the Buffalo Niagara Medical Campus, Matt Enstice took a different approach. Under Matt's leadership, BNMC has supported entrepreneurship training programs and mentorship for community members, creation of a community garden, bringing together diverse groups to explore transportation solutions, and more. Fostering participation and collaboration among neighborhood leaders, foundations, and other organizations ensures that the interests of Buffalo residents are represented. Together, these groups are creating a new model for re-energizing Buffalo—a model that has applications across the United States and around the world. City Forward explains how BNMC works to promote a shared goal of equity among companies and institutions with often opposing motivations and intentions. When money or time is scarce, how can equitable community building remain a common priority? When interests conflict, and an institution's expansion depends upon parking or development that would infringe upon public space, how can the decision-making process maintain trust and collaboration? Offering

a candid look at BNMC's setbacks and successes, along with efforts from other institutions nationwide, Enstice shares twelve strategies that innovation districts can harness to weave equity into their core work. From actively creating opportunities to listen to the community, to navigating compromise, to recruiting new partners, the book reveals unique opportunities available to create decisive, large-scale change. Critically, Enstice also offers insight about how innovation districts can speak about equity in an inclusive manner and keep underrepresented and historically excluded voices at the decision-making table. Accessible, engaging, and packed with fresh ideas applicable to any city, this book is an invaluable resource. Institutional leadership, business owners, and professionals hoping to make equitable change within their companies and organizations will find experienced direction here. City Forward is a refreshing look at the brighter, more equitable futures that we can create through thoughtful and strategic collaboration—moving forward, together.

More than simply a place to purchase goods, this veritable temple of consumerism has become a primary place for community and social interaction and an essential element in many citizens' day-to-day lives. This study explores the spiritual, emotional and physical effects of the enclosed shopping mall on the public, chronicling the growth of the mall, its role in shaping urban and suburban life, its positive and negative impacts on society and the environment, and its future viability. As this work shows, the mall remains rich in symbolic influence, and in many ways mirrors the American condition.

business first buffalo: Postindustrial DIY Daniel Campo, 2024-02-13 Chronicles grassroots efforts to recover, rebuild, and enjoy architecturally iconic but economically obsolete places in the American Rust Belt. A pioneering Detroit automobile factory. A legendary iron mill at the edge of Pittsburgh. A campus of concrete grain elevators in Buffalo. Two monumental train stations, one in Buffalo, the other in Detroit. These once-noble sites have since fallen from their towering grace. As local elected leaders did everything they could to destroy what was left of these places, citizens saw beauty and utility in these industrial ruins and felt compelled to act. Postindustrial DIY tells their stories. The culmination of more than a dozen years of on-the-ground investigation, ethnography, and historical analysis, author and urbanist Daniel Campo immerses the reader in this postindustrial landscape, weaving the perspectives of dozens of DIY protagonists as well as architects, planners, and preservationists. Working without capital, expertise, and sometimes permission in a milieu dominated by powerful political and economic interests, these do-it-yourself actors are driven by passion and a sense of civic duty rather than by profit or political expediency. They have craftily remade these sites into collective preservation projects and democratic grounds for arts and culture, environmental engagement, regional celebrations, itinerant play, and in-the-moment constructions. Their projects are generating excitement about the prospect of Rust Belt life, even as they often remain invisible to the uninformed passerby and fall short of professional preservation or environmental reclamation standards. Demonstrating that there is no such thing as a site that is "too far gone" to save or reuse, Postindustrial DIY is rich with case studies that demonstrate how great architecture is not simply for the elites or the wealthy. The citizen preservationists and urbanists described in this book offer looser, more playful, and often more publicly satisfying alternatives to the development practices that have transformed iconic sites into expensive real estate or a clean slate for the next profitable endeavor. Transcending the disciplinary boundaries of architecture, historic preservation, city planning, and landscape architecture, Postindustrial DIY suggests new ways to engage, adapt, and preserve architecturally compelling sites and bottom-up strategies for Rust Belt revival.
