business communication master degree: The SAGE Encyclopedia of Corporate Reputation Craig E. Carroll, 2016-05-31 What creates corporate reputations and how should organizations respond? Corporate reputation is a growing research field in disciplines as diverse as communication, management, marketing, industrial and organizational psychology, and sociology. As a formal area of academic study, it is relatively young with roots in the 1980s and the emergence of specialized reputation rankings for industries, products/services, and performance dimensions and for regions. Such rankings resulted in competition between organizations and the alignment of organizational activities to qualify and improve standings in the rankings. In addition, today's changing stakeholder expectations, the growth of advocacy, demand for more disclosures and greater transparency, and globalized, mediatized environments create new challenges, pitfalls, and opportunities for organizations. Successfully engaging, dealing with, and working through reputational challenges requires an understanding of options and tools for organizational decision-making and stakeholder engagement. For the first time, the vast and important field of corporate reputation is explored in the format of an encyclopedic reference. The SAGE Encyclopedia of Corporate Reputation comprehensively overviews concepts and techniques for identifying, building, measuring, monitoring, evaluating, maintaining, valuing, living up to and/or changing corporate reputations. business communication master degree: AI Impacts on Branded Entertainment and Advertising Miguélez-Juan, Blanca, Rebollo-Bueno, Sara, 2025-05-01 Connecting with the public, especially the younger generations, is challenging for brands and agencies unless they leverage new communication technologies to create engagement and foster more critical and active audiences. Consumers, often overwhelmed by messages and products, no longer need to avoid intrusive advertising. Instead, in this new advertising paradigm, they seek out brands and their advertisements to form a positive emotional connection. This intimate bond benefits both the brand and the consumer, acting as a loudspeaker for the brand's values and message. In this context, creativity and professional creatives are reaffirmed as the key differentiators for modern advertising agencies. These agencies need well-trained professionals who are not afraid to use new communication methods, including entertainment and emerging technologies like AI, which, despite being unregulated, are here to stay. AI Impacts on Branded Entertainment and Advertising explores the scientific foundations on the use of AI and branded content, understanding it as an essential tandem for the understanding of the advertising (and social) reality. Covering topics such as non-conventional media, influencer marketing, and avatar, this book is an excellent resource for marketing directors, brand creators, communication professionals, computer developers, corporate professionals, researchers, scholars, professionals, academicians, and more.
