business consulting firms in charlotte nc: Exploring the Professional Identity of Management Consultants Anthony F. Buono, Léon de Caluwé, Annemieke Stoppelenburg, 2013-03-01 The volume is based on the presentations and discussions from the Fifth European Conference on Management Consulting sponsored by the Management Consulting Division of the Academy of Management, which took place June, 2011 at Vrije Universiteit in Amsterdam, the Netherlands. The conference theme - Exploring the Professional Identity of Management Consultants - attempted to capture the highly ambiguous social status of this young and emerging profession. Management consulting does not have professional standards or accreditation criteria like those found in medicine or law, there are low barriers to entry, and a broad range of tasks are undertaken in the name of consulting. As a result, a crucial aspect of what constitutes such a loosely defined profession is the identity of its members. The professional identity of management consultants is continuously developing through the interplay of how consultants are seen and valued

by clients as well as in the larger society, and how consultancy firms and consultants identify and position themselves. This theme includes a variety of topics, ranging from the interaction between consultants and their clients, consultant rhetoric and self-presentation, and the plethora of books, media and public discourse on consulting, to human resource policies and practices, knowledge development activities of consultancy firms, career and life stories of consultants and consultancies, and consulting associations, accreditation bodies, and education programs. All of these factors contribute, either directly or indirectly, to identity construction in the field of management consulting.

business consulting firms in charlotte nc: Emerging Trends and Issues in Management Consulting Anthony F. Buono, 2009-04-01 The ninth volume in the Research in Management Consulting (RMC) series—much like the volumes that preceded it—underscores that management consulting is a multifaceted field with a truly eclectic nature. Management consultants range from sole practitioners and those working in small boutique firms to members of global consultancies that literally span the world. Their interventions can consist of relatively simple, commonly available services focused on mid- to lower level organizational members, to those that are far more esoteric in nature, providing vital assistance and direction to key players at the upper echelons of the corporate hierarchy. As consultants we can have individuals, groups and work units, or organizations as our “client,” and engagements can be dominated by junior-level specialists or guided by senior-level gurus and advisors. The volume contains 11 chapters that continue the RMC series’ commitment to enhancing our understanding of and insight into management consulting and the consulting process from a cross-cultural, global perspective. The book is divided into three sections that explore emerging issues and challenges in the management consulting industry, trends and techniques in management consulting interventions, and reflections on consulting and the consulting process. This volume, which captures the dual nature—possibilities and challenges — associated with management consulting, adds to the Janus-faced portrayal of the field. Drawing on the interplay between practice and scholarship, the volume adds to the series goal of gaining a fuller understanding of management consulting theory in practice and practice in context in a quest for actionable knowledge about consultants, consultancies and the consulting process.

business consulting firms in charlotte nc: Management Consultancy Insights and Real Consultancy Projects Graham Manville, Olga Matthias, Julian Campbell, 2017-10-05 The field of management consultancy research has grown rapidly in recent years. Fuelled by the drivers of complexity and uncertainty, a growing number of organizations – both profit and third sector alike – are looking at management consultancy to assist in their aims for development and change. Consultants have become a common feature in organizational change initiatives, involved in both providing advice and in implementing ideas and solutions. However, despite this growing recognition and influence, management consultancy is still often misunderstood or criticized for its lack of theoretical underpinning. The book seeks to address these issues by offering applied theoretical insights from academics that both teach and practice management consultancy. Written by recognized experts in their field, the contributors combine original insights with authoritative analysis. Uniquely, this book identifies emerging themes with critical discourse and provides rich empirical case study evidence to show the reader how management consultancy projects are implemented. Real-world international consultancy projects are featured as written up cases featuring organizations from multi-national corporations to the public sector. Written for graduate level managers or those who have practical leadership experience, this book will enable readers to apply management consultancy models beyond a classroom context

business consulting firms in charlotte nc: The Changing Paradigm of Consulting Anthony F. Buono, Ralph Grossmann, Hubert Lobnig, Kurt Mayer, 2011-05-01 The 13th volume in the RMC series, The Changing Paradigm of Consulting, is based on the best papers presented at the Academy of Management's Management Consulting Division's fourth international conference (2009) on the underlying dynamics within the fast-paced world of business and management consulting. Held in Vienna, Austria, the conference brought together academicians, consultants and organizational practitioners to examine the changes taking place within the consulting field. The book's 19 chapters are divided into five sections that explore the emergence and implications of this new paradigm, delineating and illustrating the paradigm shift taking place within consulting, exploring the ramifications for global consulting, examining the challenges inherent in attempts to capture collaboration and cooperation in inter-organizational networks, analyzing the push toward the professionalization - and professionalism - of consultancy, and assessing new approaches to management consulting, focusing on innovative instruments, tools and intervention frameworks. The book captures the myriad complexities and uncertainties faced by consultants and their clients and the concomitant search for appropriate mindsets, attitudes and orientations as well as methods, tools and techniques. As each of the chapters indicates, while there are significant challenges facing the consulting industry, there are also a number of promising frameworks and approaches that can help us successfully meet these challenges.
