Cautious budgetary decisions have resulted in large surpluses, creating a solid base for public expenditure programmes such as the National Development Plan, which is set to diversify the economy and boost employment. Although tapering the US Federal Reserve's quantitative easing programme is likely to affect global liquidity and play a key part in growth prospects for 2014/15, the GCC economy is still forecast to expand by 4.1% for the year, and in Kuwait, where a handful of new PPP plans and deals are slated for 2014, there are promising signs that the year could be a landmark for economic growth and expansion.

business class kuwait airways: The Airline Revolution Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the new-airline scene. The Airline Revolution will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments.

Often, the difference between a successful organisation and one that fails is that organisation's level of cultural intelligence. Cultural intelligence has never been more important as businesses globalise, especially in parts of the world that are very different to markets in the West. Cultural and social mistakes can cost businesses dearly. Learning how to do business in the Middle East without causing offence is crucial. This book provides cultural and practical business intelligence for all Western business people working throughout the Middle East. It also focuses on

issues specifically important to Western businesswomen, as well as for men who might be working with Arab and Muslim women. It can make the difference between success and failure for the reader and his or her organisation.

We lived in a village in the Lyallpur district of present-day Pakistan. Upon the country's partition, my family abandoned all our belongings and migrated empty-handed to free India and to an uncertain future. With no idea of our ultimate destination, we moved from one refugee camp to another, and spent a little over a year en route in several such camps, where the family survived on free dry rations provided by the authorities. We finally settled in Kishan Pura, a village in the Firozpur district of Punjab at the end of October 1948, and struggled every day for survival. After each meal, we did not know how and from where the next meal for our large family would come, and this struggle continued for over a year.
