business for sale bc: *Vanishing British Columbia* Michael Kluckner, 2011-11-01 The old buildings and historic places of British Columbia form a kind of “roadside memory,” a tangible link with stories of settlement, change, and abandonment that reflect the great themes of our history. With small towns declining and old rural properties changing, so little of the history of these places has been recorded in museums or archives, and so much of it may disappear as families disperse and memories dim. More than a decade ago, Michael Kluckner began painting these dots on his personal map of the province in a watercolour sketchbook. In 1999, after he put a few of the sketches on his website, a network of correspondents emerged that eventually led him to the family letters, photo albums, and memories – all from a disappearing era of the province. *Vanishing British Columbia* is a record of these places and the stories they tell. It combines engaging and insightful historical commentary with over 160 of the author’s original paintings. It has an exceptional assortment of historic imagery, including old postcards, architectural plans, and photographs. The study of roadside memory demonstrates the visceral connection that people, especially those who are part of the rural-to-urban diaspora of modern times, have for the sites of their family memories. On a grander scale this approach leads to a broader understanding of more abstract historical themes and of the province’s history and culture. It also presents a compelling argument for stewardship of regional history in the face of urbanization and globalization.

business for sale bc: *The Aid Trap* R. Glenn Hubbard, William Duggan, 2009-08-31 Over the past twenty years more citizens in China and India have raised themselves out of poverty than anywhere else at any time in history. They accomplished this through the local business sector the leading source of prosperity for all rich countries. In most of Africa and other poor regions the business sector is weak, but foreign aid continues to fund government and NGOs. Switching aid to the local business sector in order to cultivate a middle class is the oldest, surest, and only way to eliminate poverty in poor countries. A bold fusion of ethics and smart business, *The Aid Trap* shows how the same energy, goodwill, and money that we devote to charity can help local business thrive. R. Glenn Hubbard and William Duggan, two leading scholars in business and finance, demonstrate that by diverting a major share of charitable aid into the local business sector of poor countries, citizens can take the lead in the growth of their own economies. Although the aid system supports noble goals, a local well-digging company cannot compete with a foreign charity that digs wells for free. By investing in that local company a sustainable system of development can take root.

business for sale bc: Puget Sound Whales for Sale Sandra Pollard, 2021-04-13 A look at the history of the commercial capturing of orcas in Washington's Puget Sound, the whales taken, and the efforts to save them. In November, 2005, Washington's iconic killer whales, known as Southern Resident orcas, were placed on the endangered species list. It was a victory long overdue for a fragile population of fewer than one hundred whales. Author and certified marine naturalist Sandra Pollard traces the story and destinies of the many Southern Resident orcas captured for commercial purposes in or near the Puget Sound between 1964 and 1976. During this time, these highly intelligent members of the dolphin family lost nearly one-third of their population. Drawing on original archive material, this important volume outlines the history of orca captivity while also recounting the harrowing struggle—and ultimate triumph—for the Puget Sound orcas' freedom. Making liberal use of interviews, correspondence and newspaper accounts, as well as less intensive use of legislative, governmental, and nonprofit records, Pollard constructs an easily digestible narrative for lay individuals curious about the hunting of Puget Sound's Northern and Southern Resident killer whale groups between 1965 and 1976. *Puget Sound Whales for Sale* significantly succeeds the former (*Blackfish*) in breadth and depth. — Pacific Northwest Quarterly
