business grants for immigrants: Globally Competent Governance Michael Guo-Brennan, 2024-08-01 Globally Competent Governance explores promising policies and practices developed by local governments and other community leaders across the United States and beyond in their efforts to build welcoming and inclusive communities and globally competent governments. Cities of the future, be they large, regional metropolitan centers of commerce and political power, regional hubs that service central metropolitan regions, or smaller suburban or rural centers that cater to agriculture or regional commerce, will continue to evolve. Globalization and global mobility have greatly increased the cultural, ethnic, linguistic, and religious diversity in cities and communities around the globe and demand local governments build welcoming and inclusive communities for all residents, particularly newcomers. Leaders, both in and out of government, must be prepared to respond to changing needs and manage any potential challenges this may create. To better understand what local officials are facing and what they are doing to manage change, the author presents data collected through surveys and individual interviews of local officials and other community influencers. Based on these findings, the book analyzes the current state of cities and makes policy recommendations for moving forward. This book will be of interest to advanced undergraduate and postgraduate students, researchers, and academics in the fields of public policy, governance, immigration, community engagement, social welfare, and political science, as well as professionals in government and nongovernmental organizations. It will also interest professionals working with immigrants and in immigration policy.

business grants for immigrants: Immigrant Entrepreneurs Ivan Light, Edna Bonacich, 2023-09-01 A decade in preparation, Immigrant Entrepreneurs offers the most comprehensive case study ever completed of the causes and consequences of immigrant business ownership. Koreans are the most entrepreneurial of America's new immigrants. By the mid-1970s Americans had already become aware that Korean immigrants were opening, buying, and operating numerous business enterprises in major cities. When Koreans flourished in small business, Americans wanted to know how immigrants could find lucrative business opportunities where native-born Americans could not. Somewhat later, when Korean-black conflicts surfaced in a number of cities, Americans also began to fear the implications for intergroup relations of immigrant entrepreneurs who start in the middle rather than at the bottom of the social and economic hierarchy. Nowhere was immigrant enterprise more obvious or impressive than in Los Angeles, the world's largest Korean settlement outside of Korea and America's premier city of small business. Analyzing both the short-run and the long-run causes of Korean entrepreneurship, the authors explain why the Koreans could find, acquire, and operate small business firms more easily than could native-born residents. They also provide a context for distinguishing clashes of culture and clashes of interest which cause black-Korean tensions in cities, and for framing effective policies to minimize the tensions. A decade in preparation, Immigrant Entrepreneurs offers the most comprehensive case study ever completed of the causes and consequences of immigrant business ownership. Koreans are the most entrepreneurial of America's new immigrants. By the mid-19
