business hotel in kl: Chinese Business in Malaysia Terence Gomez, 2012-12-06 Chinese companies have managed to perform well in Malaysia, especially after the recession in the mid-1980s, due to a clear change in the Malay dominated government's attitude to Chinese capital. Despite the problems that prevail among UMNO politicians, the government has provided a stable economic environment and offers opportunities for domestic private investment, even for the Chinese. Given these circumstances, it does appear that Chinese capital in Malaysia has reasonable prospects for further growth in the immediate future. This study examines the dominant role of Chinese capital in the economy, providing in-depth empirical research on its mode of development and styles of operation. Covering the period from colonial times to the present day this study identifies key issues pertaining to Chinese business operations in Malaysia: ownership and control patterns, style of growth, relations with the state, politicians and other Chinese businessmen, and the manner of development of business abroad, whilst debunking the theory that large-scale Chinese capital is not very entrepreneurial in nature.

business hotel in kl: New Approaches to CSR, Sustainability and Accountability, Volume III Kıymet Tunca Çalıyurt, 2022-11-02 This book continues the discussion in the first two volumes on the challenges that organizations face in order to implement sustainability, ethics, and effective corporate governance, all of which are important elements of "standing out" from other companies. Examining the background of the New European Consensus on development with the new guiding motto 'Our World, Our Dignity, Our Future,' the authors explore how this new legislation on

sustainability issues around the world is forcing companies to deal directly with sustainability issues. The 2030 Agenda for Sustainable Development (2030 Agenda), adopted by the United Nations in September 2015, is the international community's response to global challenges and trends in connection with sustainable development. With the Sustainable Development Goals (SDGs) at its core, the 2030 Agenda is a transformative political framework designed to eradicate poverty and achieve sustainable development globally. It balances the economic, social, and environmental dimensions of sustainable development, including the key issues of governance and peaceful and inclusive societies, and recognizes the essential interlinkages between its goals and targets, i.e., that they must be implemented as a whole and not selectively. The respective chapters in this volume raise a number of questions regarding corporate social responsibility, ethics, and corporate governance in the face of new technology, and new approaches to climate change and sustainability reporting.
