Below me, gradually going into shadow, was the Earth. And over my right shoulder was the universe.' In fascinating and personal detail, and drawing on exclusive diaries and audio recordings from his mission, astronaut Tim Peake takes readers closer than ever before to experience what life in space is really like: the sights, the smells, the fear, the sacrifice, the exhilaration and the deep and abiding wonder of the view. business lounge lufthansa: The Airbus A380 Graham M. Simons, 2014-08-13 The Airbus A380 is a commemorative volume preserving the history of this iconic craft in words and images from

aviation writer and historian Graham Simons. Every seven minutes, an A380 takes off or lands somewhere in the world. The Airbus was initially designed and developed in order to provide a contender to the Boeing's growing monopoly of the skies in the biggest large-aircraft market in the world. Ambitious in design, the undertaking seemed mammoth. Yet scores of aviation engineers and pilots worked to get the design off the ground and the Airbus in our skies. This double-decker, wide-body, 4 engine jet airliner promised to redefine expectations when it came to commercial flight. In *The Airbus A380*, Graham Simons provides an impressively illustrated narrative history of the craft, its achievements, and the legacy it looks set to provide to a new generation of aviation engineers, enthusiasts and passengers. Operated by airlines such as Emirates, Singapore Airlines, Qantas, and Lufthansa, the story of the A380 could be said to represent the story of modern-day travel itself, characterized by major technological advances across the world that constantly push the boundaries of expectation.

business lounge lufthansa: The David Shirazi Collection Joel C. Rosenberg, 2014-05-01 The complete 3-book espionage and spy thriller series that has sold 700,000 copies! This product bundles three of Joel Rosenberg's blockbuster thrillers featuring David Shirazi together into one e-book. *The Twelfth Imam* As the apocalyptic leaders of Iran call for the annihilation of Israel and the U.S., CIA operative David Shirazi is sent into Tehran with one objective: use all means necessary to disrupt Iran's nuclear weapons program—without leaving American fingerprints, and without triggering a regional war. At extreme personal risk, Shirazi undertakes his assignment. A native Farsi speaker whose family escaped from Iran in 1979, he couldn't be better prepared for the mission. But none of his training has prepared Shirazi for what will happen next. An obscure religious cleric is suddenly hailed throughout the region as the Islamic messiah known as the Mahdi or the Twelfth Imam. News of his miracles, healings, signs, and wonders, spread like wildfire, as do rumors of a new and horrific war. With the prophecy of the Twelfth Imam seemingly fulfilled, Iran's leaders prepare to strike Israel and bring about the End of Days. Shirazi must take action, but the clock is ticking. *The Tehran Initiative* The world is on the brink of disaster, and the clock is ticking. Iran has just conducted its first atomic weapons test. Millions of Muslims around the world are convinced their messiah—known as the Twelfth Imam—has just arrived on earth. Israeli leaders fear Tehran, under the Twelfth Imam's spell, will soon launch a nuclear attack that could bring about a second Holocaust and the annihilation of Israel. The White House fears Jerusalem will strike first, launching a preemptive attack against Iran's nuclear facilities that could cause the entire Middle East to go up in flames, oil prices to skyrocket, and the global economy to collapse. With the stakes high and few viable options left, the president of the United States orders CIA operative David Shirazi and his team to track down and sabotage Iran's nuclear warheads before Iran or Israel can launch a devastating first strike. *Damascus Countdown* All eyes are on the Middle East. Israel has successfully launched a first strike on Iran, taking out all of their nuclear sites and six of their nuclear warheads—and causing The Twelfth Imam to order a full-scale retaliation. U.S. President William Jackson threatens to support a U.N. Security Council resolution condemning the Jewish State for unprovoked and unwarranted acts of aggression. Meanwhile, CIA operative David Shirazi has infiltrated the Iranian regime and intercepted information indicating that two Iranian nuclear warheads survived the attack and have been moved to a secure and undisclosed location. In danger not only from the ongoing missile strikes on Iran but also from the increasingly hostile and suspicious governments of multiple countries, David and his team are in a race against time to find the remaining nuclear warheads before disaster strikes.

business lounge lufthansa: 21st Century Airlines Nawal K. Taneja, 2017-09-08 In 21st Century Airlines: Connecting the Dots, Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by 'connecting the dots' at four key levels: recognizing the implications of global events, improving cross-functional collaboration within the organization, working more closely with the travel chain, and providing much higher engagements with connectors within the social networks. The book synthesizes insights gained from the experience of non-traditional businesses, such as Uber, that have no physical assets and that focus on scalability through platforms, as well as traditional businesses, such as Mercedes-Benz, that are transitioning from operators of physical assets to adapt to the on-demand and sharing economies. These insights show pragmatically that digitizing airline businesses would require digital mind-sets, digital technologies, digital strategies, and digital workplaces to explore new frontiers in value for both customers and airlines. Moreover, forward-thinking airlines need to consider working with bimodal organizational structures, in which one group optimizes current business models (network, fleet, and schedule planning, as well as revenue management) while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the journey. The book is written for all senior-level practitioners of airlines and related businesses worldwide, as well as senior-level government policymakers.
