business management certificates online: Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment Chatham, Daniel, 2021-01-08 The current learning environment is substantially different than what existed for most of the 20th century. Learners and teachers today must navigate in perpetually changing contexts where education is influenced by technological advancement and obsolescence, economic barriers, a changing employment landscape, and even international politics. Studies indicate that employers seek to hire graduates with strong skills in areas coalescing around international awareness, creativity, communication, leadership, and teamwork. Skills and experiences in these areas are necessary preparation for the current economy and to pursue jobs that do not exist yet, while providing some insulation against the obsolescence of industries that lack these characteristics. These interpersonal skills are not often the subject of students' degrees, yet there are opportunities in online education to cultivate them. With increased interest in new career options comes the need to reconsider how to teach subjects in the increasingly online environment. *Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment* is a critical reference book that navigates today's dynamic education requirements and provides examples of how online learning can foster growth in skill areas necessary for career advancement through effective course design. Moreover, it helps educators gain insight into online pedagogy and course design for the 21st century learner and prepares them to convert traditional courses and enhance existing online courses, thereby supporting students' growth and development in the highly dynamic online learning environment. Focusing on specific learning activities, assessments, engagement, communication techniques, and more, this book provides a valuable resource for those seeking to upgrade teaching and learning into the online environment, those that seek better employment outcomes for their students, and those seeking to explore contemporary online course design strategies or examples. This includes teachers, instructional designers, curriculum developers, academicians, researchers, and students.

business management certificates online: *Leary's Global Wineology* Charlie Leary, PhD, MA, 2022-11-15 This is the only complete guide to wine education programs, classes, and scholarship. Those wishing to increase their understanding and appreciation of wine for personal enjoyment or social know-how, and those who desire to pursue or advance a professional career in the wine industry now confront a plethora of wine education options with a confusing array of titles, degrees, certificates, and specializations. Some wine education is free and short, while other programs can cost dearly in time and money. Some courses of study take a few hours and others a few years. Institutions offering wine education vary from state colleges and universities to non-profit organizations and many profit-seeking companies. Sommeliers require training that may be mostly useless to vintners. Someone who wants to deftly handle ordering wine in a restaurant probably doesn't want to learn about wine chemistry or Integrated Pest Management. Which program is right for you? What's the difference between an MS and an MW or an MS in viticulture? Is the education for a CWE the same as that for a WSET Diploma? Are some schools better for learning about wine journalism than the wine business? This book will help answer such questions. There are chapters on wine studies programs and credentials, including for sommeliers and those working in the wine trade; university viticulture and enology programs; wine business study programs; free online wine education courses; wine studies scholarships; and wine mentorship programs. Advance Praise for *Leary's Global Wineology*: This groundbreaking book on wine education will be useful to business owners as well as wine enthusiasts. When I bought my wine business, I looked far and wide for guidance on classes or programs to strengthen my wine knowledge. Nothing existed. It was an arduous task to figure out which course to take amongst the so many offered! Charlie Leary has now filled that gap. It will be useful to me not only in assessing candidates for employment, but also as a resource in training my staff. This guide is indispensable for anyone in the wine trade, writ large, and has lots of information of use to the general wine-drinking public who want to learn more. business management certificates online: *Facilitating Learning in Online Environments* Steven R. Aragon, 2010-04-22 This volume presents models, methods, and strategies that facilitate and promote learning within online environments. Arguing that success in online environments is dependent on the role of autonomy in order to create sustained and enduring learners, the introductory chapter presents current research and identifies ways through which autonomous learning is established within the learning environment. Contributors demonstrate how quality online

programs are made up of a blend of technology, pedagogy, organization, strategy, and vision; explore the concept of online social presence as a significant factor in improving instructional effectiveness and contributing to a feeling of community among learners; and offer strategies for instructors facing the new challenges and opportunities of the online educational experience. Two chapters examine master's level online programming by exploring a model through which the design template for one such program was built and presenting the actual experiences students who completed master's degrees online. Editor Steven R. Aragon joins his colleagues to make the case that instructional designers need ways to support quality teaching and learning within online environments that take into account the variability in student learning styles, provide external motivation for the isolated students, and build community, collaboration, and communications among learners. Finally, contributors from the field analyze the impact that online technology is having on training and development initiatives of business and industry and demonstrate how current trends have cultivated an environment open to online learning. This is the 100th issue of the Jossey Bass series *New Directions for Adult and Continuing Education*.
