business plan for travel agency pdf: *ICT Tools and Applications for Accessible Tourism*

Eusébio, Celeste, Teixeira, Leonor, Carneiro, Maria João, 2021-02-26 The contribution of tourism to create an inclusive society requires the adoption of new approaches and strategies that promote the accessibility of tourism destinations, allowing all people, regardless of their health condition, to enjoy tourism experiences. To accomplish this objective, it is of utmost relevance to promote the active involvement of all stakeholders of the tourism system (demand, supply, government entities, and educational institutions) in the creation of accessible and adapted tourism products. However, the scarce literature in this area suggests that the people working in the tourism industry are not usually aware of several needs and travel constraints of persons with disabilities and that the information delivered by traditional information sources to this market is frequently inadequate, inaccurate, or incomplete. Therefore, the information and communication technologies (ICTs) may have a crucial role to overcome the several travel constraints that these people face to plan and carry out a tourism trip as well as to enable supply agents to develop accessible tourism products. Despite this, although in recent years research regarding accessible tourism has increased, the number of studies on the contributions of ICTs for the development of accessible research is scarce. *ICT Tools and Applications for Accessible Tourism* provides theoretical and practical contributions for accessible tourism in the growing tourism market for social responsibility issues and as an excellent business opportunity. Chapters within this critical reference source cover the academic discussion of global accessible tourism, increased knowledge of disabilities, ICTs that can be used, and emerging technologies. This book is intended for all practitioners in the tourism industry along with IT specialists, government officials, policymakers, marketers, researchers, academicians, and students who are interested in the latest tools, technologies, and research on accessible tourism.

business plan for travel agency pdf: *Cutting carbon, creating growth* Great Britain:

Department for Transport, 2011-01-19 This White Paper, entitled *Creating growth, cutting carbon: making sustainable local transport happen*, sets out the Government's aims in meeting two key objectives: (i) to help create growth in the economy; (ii) tackling climate change by cutting carbon emissions. Action at the local level is seen as delivering gains at the national level. For example, around every three trips made by car are less than 5 miles in length, and it could be argued many such trips could alternatively be cycled, walked or undertaken by public transport. The Government sees the encouragement of sustainable travel choices benefiting the economy, cutting carbon and contributing to road safety and public health. The new Local Sustainable Transport Fund aims to help local authorities to encourage people to travel sustainably. The publication is divided into nine chapters with one annex, and looks at the following areas: local transport - choices and implications; decentralising power - enabling local delivery; enabling sustainable transport choices; active travel; making transport more attractive; managing traffic to reduce carbon and tackle congestion; local

transport in society.

business plan for travel agency pdf: Power Hungry Robert Bryce, 2011-04-26 The promise of green jobs and a clean energy future has roused the masses. But as Robert Bryce makes clear in this provocative book, that vision needs a major re-vision. We cannot -- and will not -- quit using carbon-based fuels at any time in the near future for a simple reason: they provide the horsepower that we crave. The hard reality is that oil, coal, and natural gas are here to stay. Fueling our society requires more than sentiment and rhetoric; we need to make good decisions and smart investments based on facts. In *Power Hungry*, Bryce provides a supertanker-load of footnoted facts while shepherding readers through basic physics and math. And with the help of a panoply of vivid graphics and tables, he crushes a phalanx of energy myths, showing why renewables are not green, carbon capture and sequestration won't work, and even -- surprise! -- that the U.S. is leading the world in energy efficiency. He also charts the amazing growth of the fuels of the future: natural gas and nuclear. *Power Hungry* delivers a clear-eyed view of what America has in the tank, and what's needed to transform the gargantuan global energy sector.

business plan for travel agency pdf: Best Practices in Metropolitan Transportation Planning Reid Ewing, Keith Bartholomew, 2018-06-27 Planning at a metropolitan scale is important for effective management of urban growth, transportation systems, air quality, and watershed and green-spaces. It is fundamental to efforts to promote social justice and equity. *Best Practices in Metropolitan Transportation Planning* shows how the most innovative metropolitan planning organizations (MPOs) in the United States are addressing these issues using their mandates to improve transportation networks while pursuing emerging sustainability goals at the same time. As both a policy analysis and a practical how-to guide, this book presents cutting-edge original research on the role accessibility plays - and should play - in transportation planning, tracks how existing plans have sought to balance competing priorities using scenario planning and other strategies, assesses the results of various efforts to reduce automobile dependence in cities, and explains how to make planning documents more powerful and effective. In highlighting the most innovative practices implemented by MPOs, regional planning councils, city and county planning departments and state departments of transportation, this book aims to influence other planning organizations, as well as influence federal and state policy discussions and legislation.
