business self improvement books: Self-Help Books Sandra K. Dolby, 2010-10-01
Understanding instead of lamenting the popularity of self-help books Based on a reading of more than three hundred self-help books, Sandra K. Dolby examines this remarkably popular genre to define self-help in a way that's compelling to academics and lay readers alike. Self-Help Books also offers an interpretation of why these books are so popular, arguing that they continue the well-established American penchant for self-education, they articulate problems of daily life and their supposed solutions, and that they present their content in a form and style that is accessible rather than arcane. Using tools associated with folklore studies, Dolby then examines how the genre makes use of stories, aphorisms, and a worldview that is at once traditional and contemporary. The overarching premise of the study is that self-help books, much like fairy tales, take traditional materials, especially stories and ideas, and recast them into extended essays that people happily read, think about, try to apply, and then set aside when a new embodiment of the genre comes along.

business self improvement books: Persuasion in Self-improvement Books Jeremy Koay, 2019-02-25 This book investigates how persuasion relates to values in self-improvement literature, revealing the discursive practices used to persuade and engage their readers, and construct a credible persona. The author adopts a corpus-driven approach that encompasses an examination of genre analysis and linguistic features such as narrative, pronoun, grammar and structure. The book further draws on insights from original interviews with writers and readers of self-improvement books, as well as people who do not read the genre. It begins by providing a helpful overview of the concepts of ideology and genre. A brief history of self-improvement books and their values and

assumptions provide the context for the analysis. Where relevant, linguistic features in self-improvement books are compared with other genres (e.g. academic text, conversation, news). This book will be of interest to students and scholars in the fields of linguistics, culture and media studies.

business self improvement books: *The Afterlife of Toyotomi Hideyoshi* Susan Westhafer Furukawa, 2023-11-20 Popular representations of the past are everywhere in Japan, from cell phone charms to manga, from television dramas to video games to young people dressed as their favorite historical figures hanging out in the hip Harajuku district. But how does this mass consumption of the past affect the way consumers think about history and what it means to be Japanese? By analyzing representations of the famous sixteenth-century samurai leader Toyotomi Hideyoshi in historical fiction based on Taikōki, the original biography of him, this book explores how and why Hideyoshi has had a continued and ever-changing presence in popular culture in twentieth- and twenty-first-century Japan. The multiple fictionalized histories of Hideyoshi published as serial novels and novellas before, during, and after World War II demonstrate how imaginative re-presentations of Japan's past have been used by various actors throughout the modern era. Using close reading of several novels and short stories as well as the analysis of various other texts and paratextual materials, Susan Furukawa discovers a Hideyoshi who is always changing to meet the needs of the current era, and in the process expands our understanding of the powerful role that historical narratives play in Japan.

In contemporary discourse Islam and modernity are often presented as each other's opposites in media and popular culture. Southeast Asia has a large Muslim population, especially in Indonesia, Malaysia, and Singapore, but Islamic culture in these states is conspicuously absent from the wider global discourse on Islam. With a focus on popular culture in Indonesia – a country that houses the world's largest Muslim population and that is also undergoing modernisation – *Islamic Modernities in Southeast Asia* will demonstrate how Islamic modernities are being negotiated and constructed through popular and visual culture from a trans-regional perspective. Looking at a variety of Islamic-themed popular and visual culture including rock music, cinema, art, visual decorations in shopping malls, self-help books, and fashion blogs, the book explores how Islamic modernities are imagined, negotiated, contested, and shared in Southeast Asia.
