Each person is born with a unique set of psychological tendencies and life potentials. This book "Education and Career in Vedic Astrology" enables the astrologer to know what the Education and Career has in store for the native. The horoscope shows us what we are presently working with, based on our past actions and thoughts. Besides providing deep insight into the past and present, the horoscope can also show future trends of events. Vedic astrology readings of your horoscope can

not do much about it, but at least make you aware of the fruitfulness of your potential in the specific direction of education and career. And, with proper mentoring and understanding; you can safeguard yourself from sacrificing your life just for the sake of money. Before addressing the suitability of a specific arena for the job, business or any other professional activity; the prime requirement is to consider the overall potency of a horoscope for professional matters. Selection of education and career between job and business is a very crucial and important decision of life. Following the planetary strength of your horoscope, Vedic astrology readings are reasonably useful to help you in selecting the best option between job and business. In brief, the following aspects of a horoscope are to be analyzed to find out best suitable option between Job and Business with astrology readings of ascendant, tenth, third, fifth, and sixth Bhava and the nature of all these planets involved. This knowledge can help the individual make use of latent potentials and approach life's challenges with greater care and purpose. By understanding the karmic patterns reflected in the horoscope, it is possible to work with these tendencies and potentials to promote greater peace, prosperity, and happiness in life. The light that is shed on a dire personal situation by Vedic Astrology is priceless. The ancient Vedic system provides a predictive system that can accurately predict the Profession and Career. The timing is calculated with a detailed system of planetary time cycles, called "Dasha." Vedic astrology provides a greater scope, depth and accuracy for predicting the 'Profession and Career', i. e. (i) General type of predictions; (ii) Specific type of predictions and (iii) Stick type of predictions of Profession and Career. Given an accurate birth time, the Dasha system can precisely show when a period of Profession and Career will begin and end, and provide actual dates. Of two people with wonderful careers, great relationship potential and wealth indicated in their charts, one may find his niche early in life, while the other must experience difficult times to finally achieve prosperity later in life. The Vedic system can indicate the timing of Career as well as their extent. It uses the Moon's position as the starting point against the background of a Nakshatra in calculations of the planetary periods within the 120-year potential lifespan. The principles governing Vedic astrology have remained unaltered for thousands of years. Vedic astrology acknowledges only nine planets, such as Sun, Moon, Mercury, Venus, Mars, Jupiter, Saturn and the two nodes of the Moon called Rahu and Ketu.

business related career: Undergraduate ELT in Sri Lanka Asantha U. Attanayake, 2018-12-17 The book looks into the South Asian experience of English language education in the first decade of the 21st century by examining its policies, practices and perspectives in Sri Lanka. It discusses the evolution of English from the language of administration of the former South Asian colony up to its present and intended, although poorly implemented, status as a "link-language" in Sri Lanka. The official removal of English as the language of administration after independence, the twists and turns of its practice in various domains over six decades, and the views of today's students and teachers reveal that there is more to English language education in a post-colonial context than current theories address. This book concentrates on what educationalists in English Language Teaching do, the goals that curriculum designers must capture, and how post-colonial attitudes towards English hinder the teaching of English as a second language. This book emphasizes that the general principles of teaching English as a second language need specific modifications at the delivery stage in South Asian societies.

business related career: Turbulence in the American Workplace Peter B. Doeringer, Kathleen Christensen, Patricia M. Flynn, Douglas T. Hall, Harry C. Katz, Jeffrey H. Keefe, Christopher J. Ruhm, Andrew M. Sum, Michael Useem, 1991-01-31 Turbulence--rapid and sometimes tumultuous changes--has characterized the labor markets of the 1970's and 1980's. Turbulent competitive conditions have cut sharply into profits and have forced downsizings and radical readjustments in America's workplaces. Workplace turbulence has resulted in lost jobs, declining incomes, and falling productivity for American labor. From the perspectives of business and labor, turbulence and its consequences is the key human resources issue for the last part of the twentieth century. In *Turbulence in the American Workplace*, a distinguished group of experts forcefully and convincingly argue that the human resources capacity of the private sector is the first line of defense against turbulence and is of equal importance to public sector education and training programs. The authors--including Kathleen Christensen, Patricia M. Flynn, Douglas T. Hall, Harry C. Katz, Jeffrey H. Keefe, Christopher J. Ruhm, Andrew M. Sum, and Michael Useem--effectively demonstrate how global competition, deregulation, and technological change are creating hard choices for employers that will alter both the living standards of workers and the performance of American industry in the coming decades. This illuminating work will be of significant value to business school faculty, corporate strategic planners, and general managers, as well as students and professionals interested

in the areas of public policy, industrial relations, education, and labor studies.
