Understanding the Importance of Hiring Felons

The hiring of felons is not just a compassionate act; it is a necessary step toward reducing recidivism and promoting societal well-being. By offering employment opportunities to individuals with criminal records, businesses can help break the cycle of crime and incarceration. Employment provides financial stability, a sense of purpose, and reintegration into the community, which are essential for successful rehabilitation.

Moreover, many employers are recognizing the potential benefits of hiring felons. With a shortage of skilled labor in various sectors, tapping into this often-overlooked workforce can be advantageous. The diversity of experiences and perspectives that individuals with criminal records bring can enhance workplace culture and innovation.

Industries That Commonly Hire Felons

Various industries are more open to hiring felons due to the nature of their work, labor shortages, or company policies that promote inclusivity. Here are some key industries that frequently employ individuals with criminal backgrounds:

- **Construction:** Many construction companies are willing to hire felons, as the industry often faces labor shortages. The physically demanding nature of the work can lead to high turnover rates, creating opportunities for ex-offenders.
- **Manufacturing:** Like construction, the manufacturing sector often needs workers and can provide entry-level positions that do not require extensive background checks.
- **Hospitality and Food Services:** Restaurants and hotels often have a high demand for staff, and many are willing to overlook criminal records, especially for roles such as servers, cooks, and housekeeping staff.

Benefits of Hiring Ex-Offenders

Employing individuals with criminal records can bring numerous benefits to businesses. They may also face legal barriers, such as restrictions on certain professions based on their convictions. These challenges can create a significant gap in employment opportunities for this population.

Resources for Employers and Job Seekers

To facilitate the hiring of felons, various resources are available for both employers and job seekers. Organizations such as the National HIRE Network provide information and support for employers looking to implement fair hiring practices. They offer guidance on best practices for integrating ex-offenders into the workforce.

For job seekers, numerous programs focus on helping individuals with criminal records find employment. These programs often provide job training, resume workshops, and interview preparation. Additionally, many non-profit organizations and local government agencies offer resources to assist felons in their job search.

Notable Companies That Hire Felons

Several well-known companies have established policies to hire individuals with criminal records, demonstrating a commitment to inclusivity and second chances. Some of these companies include:

business that hire felons: The Felon John Irwin, 1987-11-11 Since its first publication , 'The Felon' has become a classic of criminal sociology. Based on in-depth interviews and two years of participant observation, this book traces the career path of the felon - from early environment to crime to prison to parole - from the point of view of the offender. Engaging and readable, Irwins description of the life of felons, and his conclusions about the role of prisons in our society remain convincing and topical.

business that hire felons: From Here To The Streets Joseph L. Chiappetta Jr., 2012-11-27 The corrections employee who inspired me to design this book knew what most of you reading this already know that the only hope that more than 90 percent of incarcerated inmates nationwide have

for not returning to prison is steady employment. There are numerous books on this subject already, and most of them say the same things. It's also fair to say that most are accurate. This course doesn't try to reinvent the wheel, so to speak, but instead gives a step-by-step guide for preparing and facilitating a prerelease employability class in a corrections environment. Prison inmates are, for the most part, challenged with a wide variety of social dysfunctions. Educational backgrounds vary as well. It is critical to make the prerelease employability class both user-friendly and student specific for the challenges presented by the prison itself. Ultimately, it's up to an individual whether or not he or she chooses to succeed or improve the quality of their life. The key is to make this goal in life attainable and realistic to the students, thus encouraging them to make that choice. Remember that even the best plans in the world are nothing without good people to carry them out. If you're planning to teach or assist in a corrections prerelease employability course, you must understand and believe in its benefits. Not only believe, but also participate by sharing your own personal experiences and opinions to the extent that policy allows. Only by interacting with the class on a more personal level will you get the respect and trust of your students. By operating in this capacity, you become as important an asset to the course as the written material itself. The results of your efforts will be reflected in the future success stories from your students.

It is a faith-based discovery process with the fundamental purpose to help us understand and accept the truth of who we are, what we have become, how we got here, and if we are willing to make the necessary changes in our life to become who we want to be. Our challenge is to be boldly honest and truthful about our past to ourselves. Are we willing to make a commitment to persevere through the effort required to change into a new us? Are we willing to accept responsibility for our past and any accountability required to move forward? Part of this effort is setting and prioritizing goals and expectations, first with ourselves and our relationship with God, and secondly with those people who are on our bus--the people you associate with. Do you have the strength and courage to change the people who are on your bus and/or remove yourself from a bus you shouldn't be on?

business that hire felons: Business Doing Good Shannon Deer, Cheryl Miller, 2021-08-15
Outlines six principles and best practices for hiring and retaining women with challenging backgrounds Recently, business leaders have shifted their focus from a profit-only mindset to considering the impact of their businesses on all stakeholders. At the same time, the United Nations set aggressive Sustainable Development Goals (SDGs) to improve our world by 2030. These SDGs address all major needs facing our world today, such as: eradication of poverty and hunger, access to clean water, gender equality, and decent work and economic growth. These are significant problems facing the world that have in the past largely been left to nonprofit organizations and governments to solve. Investors and customers have higher expectations for companies to make a positive social and environmental impact. They want to know business can do good. Following suit, today's business leaders are starting to recognize we will never fill the gap between where we are and where we want to be if businesses do not also do their part to contribute sustainable solutions to these enormous social problems. This book provides a guide for businesses to make a significant positive impact while also benefiting their businesses. Business Doing Good outlines six principles business leaders can implement to effectively hire women who have experienced incarceration, poverty, addiction, and/or engagement in the sex trade. While making a difference to both these women and communities, businesses benefit from the women's resourcefulness, resilience, ability to motivate, and other unique skills and perspectives only available to someone who has overcome difficulties. Investments in women, in general, are exponential as they are more likely to return that investment to future generations. The impact is endless. If we are going to end poverty and create economic development, women who have overcome challenging pasts cannot be excluded.

business that hire felons: Integrating Substance Abuse Treatment and Vocational Services - TIP 38 U.S. Department of Health And Human Services, 2019-11-22
Unemployment and substance abuse may be intertwined long before an individual seeks treatment. Although the average educational level of individuals with substance abuse disorders is comparable to that of the general U.S. population, people who use substances are far more likely to be unemployed or underemployed than people who do not use substances. According to the U.S. Census Bureau, employment rates for the non-substance-using population ranged from 72.3 percent in 1980 to 76.8 percent in 1991. However, employment rates of the population with substance abuse problems before admission or at admission to treatment have remained at relatively stable, low levels since 1970, ranging from 15 to 30 percent. Most of the research on the employment rates of persons with substance abuse disorders has focused on opiate-dependent persons (usually heroin), and employment rates for other substance users may vary. The data clearly indicate the need for interventions to improve employment rates...

business that hire felons: Money, Work, and Crime Peter H. Rossi, Richard A. Berk, Kenneth J. Lenihan, 2013-09-03 Money, Work, and Crime: Experimental Evidence presents the complete details of the Department of Labor's \$3.4 million Transitional Aid Research Project (TARP), a large-scale field experiment which attempted to reduce recidivism on the part of ex-felons. Beginning in January 1976, some prisoners released from state institutions in Texas and Georgia were offered financial aid for periods of up to six months post-release. Payments were made in the form of Unemployment Insurance benefits. The ex-prisoners who were eligible for payments were compared with control groups released at the same time from the same institutions. The control groups were not eligible for benefits. The assumption that modest levels of financial help would ease the transition from prison life to civilian life was partially supported. Ex-prisoners who received financial aid under TARP had lower rearrest rates than their counterparts who did not receive benefits and worked comparable periods of time. Those receiving financial aid were also able to obtain better-paying jobs than the controls. However, ex-prisoners receiving benefits took longer to find jobs than those who did not receive benefits. The TARP experiment makes a strong contribution both to an important policy area—the reduction of crime through reducing recidivism—and to the further development of the field and experiment as a policy research instrument.
