central business district sydney map: Planning Olympic Legacies Eva Kassens-Noor, 2012 In this book the author seeks to challenge the view that winning the Olympics benefits the urban and transport projects of the host city. She argues that the urban realities often significantly differ from the development path the host city had set out to accomplish before winning the Olympic bid. Includes interviews from lead host city planners, and focusses on four cities that have hosted the Olympics: Barcelona. Atlanta, Sydney, Athens. The author forecasts London and Rio de Janeiro's urban trajectories and advises cities on how to advance their urban strategic plans and interests while fulfilling the International Olympic Committee's (IOC) fundamental requirements.

central business district sydney map: Governing Public-Private Partnerships Joshua Newman, 2017-06-26 Governments around the world are clamouring to engage the private sector in order to build infrastructure and deliver public services. However, the role of the state in managing new relationships with companies is often murky. Is the government a slow and wasteful bureaucracy that must be held at bay or is it a necessary authority? Assessing the appropriate role for governments within these partnerships and the factors that lead to their success or failure, *Governing Public-Private Partnerships* delves into two examples of collaborative projects in urban transportation: Vancouver's Canada Line and the Sydney Airport Rail Link. Through personal interviews with CEOs, senior bureaucrats, and politicians, Joshua Newman compares the strategies pursued by an active and shrewd provincial government in British Columbia with the more hands-off

state government in New South Wales, Australia. By supporting networks of players in the transportation game, actively seeking lessons from international experience, and innovating responses to novel policy problems, the public sector was able to lead the Canada Line partnership to operational success. In Sydney, however, the unwillingness of the state government to manage the partnership resulted in a sluggish Airport Link that, after sixteen years in operation, still has not met its original expectations. At a time of renewed interest in private involvement with public services, *Governing Public-Private Partnerships* provides an in-depth look into how the state can – and must – remain involved.
