business visa united kingdom: United Kingdom International Monetary, International Monetary Fund. European Dept., 2023-07-11 Market stress following the September 2022 'mini-budget' has dissipated, in the context of a successful financial stability intervention by the Bank of England (BoE) and two prudent budgets. Post-Brexit uncertainty has declined somewhat due to the Windsor Framework agreement to resolve disputes around the Northern Ireland Protocol. Still, the economy faces several challenges. The post-pandemic recovery was disrupted by the sharp energy price shock due to Russia's war in Ukraine; labor force participation has declined, mainly on account of rising long-term illness; and large policy rate increases—needed to arrest high and sticky inflation—have tightened financial conditions. Accordingly, and despite recent upgrades, GDP

growth is forecast at a modest 0.4 percent for 2023, followed by 1 percent growth in 2024. Lower energy prices and emerging economic slack is projected to help reduce headline inflation to around 5 1/4 percent by end-2023 and to the 2 percent target by mid-2025. Risks are tilted to the downside for growth and to the upside for inflation. Tighter-than-expected global financial conditions present the key downside risk to growth, while robust wage growth and greater inflation persistence pose upside risks to inflation.
