canadian business magazine: *Selling Themselves* Russell Johnston, 2012-02-01 From its origins in the Victorian era as a marginal and somewhat shady enterprise, the advertising trade in Canada changed radically after the turn of the century - rising quickly to a position of influence and respectability. In this book, Russell Johnston tells the story of the people who made it so. Johnston's setting is the dynamic intersection of business and culture during the early decades of the twentieth century. During this period, he argues, magazines and newspapers grew increasingly dependent on sales of advertising space, and this precipitated a widespread restructuring of the publishing industry. Ultimately, this affected the range and content of Canadian periodicals, setting the

parameters for a newly invigorated, though still fragile, Canadian magazine industry. Johnston charts this process by exploring the lives, goals and ideas of a new breed of solicitor, the ad agent, and shows how agencies began to draw on the disciplines of psychology and economics to promote their products, thus initiating the modern market research industry. The only thorough analysis of the forces shaping advertising in Canada prior to 1930, this study documents the emergence in Canada of a key component of the modern culture of consumption.

canadian business magazine: The State in Transition Michael Behiels, François Rocher, 2022-08-10 Canadian federalism, as a particular form of political organization for a complex society—with multiple economic, political, geographic, cultural, and national divides—faces important challenges. The political realignment that brought the Conservative Party to power in the last quinquennium has set in motion a significant transformation of the Canadian state and its federal system of governance. The contributors in this collection focus on three recurrent themes: the issues arising from the management of ethno-cultural diversity; the existence of internal nations in Canada (the First Nations and the Quebec nation in Quebec), the presence of linguistic minorities (French and English), and the questions of identity linked to citizenship in a federal context that allows for the presence of multiple loyalties; and the specific challenges raised by globalization and the extension of economic integration, particularly between the United States and Canada. This collection of studies on the role of the state reveals that our understanding of the evolution of the Canadian state, and of the ensuing impact on federalism and federal-provincial relations, is not as complete as it should be.

canadian business magazine: Deep, Dark and Dangerous Vickie Jensen, 2021-10-30 How British Columbia became an international hotspot for submarines, submersibles, Newt Suits, underwater robotics and a host of other cutting-edge undersea technologies. In *Deep, Dark and Dangerous*, maritime historian Vickie Jensen explores the fascinating story of British Columbia's rise to become a world leader in the underwater tech industry, tracing BC's colourful history and bright future as a front runner in the world of subsea technology innovation. This little-known saga began with the remarkable story of *Pisces I*. In the early 1960s, two commercial hard-hat divers from the Vancouver area, Don Sorte and Al Trice, and engineer Mack Thompson realized that they needed a small manned submersible with robot arms for deep-sea work. They couldn't find one to buy, so they decided to build their own. Experts told them such things could only be built in specialized facilities and it would be suicidal to try a home-made version. Just over two years and \$100,000 later their *Pisces I* was successfully making two-thousand-foot dives. The three innovators formed a company called International Hydrodynamics (HYCO) as orders started to arrive from around the world. In the

process of building some fourteen submersibles, HYCO would serve as an incubator for a generation of experts that would launch an entire industry of subsea companies in BC. Drawing on her background in documenting both history and industry, Vickie Jensen uncovers stories, both historical and current, detailing the submarines, submersibles, robots, torpedo recovery technology and inventions that are responsible for BC's remarkable and continuing subsea reputation. Written with colour and flair, this is a fascinating and exciting story that anyone can enjoy.

canadian business magazine: Partial Visions Richard M. Merelman, 1991 A pathbreaking study of political culture in the United States, Britain, and Canada, *Partial Visions* demonstrates how

popular culture--expressed through television soap operas and comedies, civics and history textbooks, magazine advertisements, and corporate publications and recruitment leaflets--subtly deflects and suppresses democratic political action. Richard Merelman argues that political messages embedded in popular culture weaken the division between public and private and between society and the individual. These partial visions of democracy are idealized yet inequitable, revelatory yet distorted. As a result, issues that might galvanize useful group conflict do not emerge, and the full potential for public participation in a liberal democracy remains unrealized. Britain, Canada, and the United States share a liberal political culture but differ in their historical evolution and in the structure of their institutions. Each country, Merelman suggests, has developed a distinctive popular culture that shapes public opinion and stifles political debate in nationally specific ways. Different rhetorical devices and metaphors operate in each nation, he points out; in Britain, for example, the monarchy and party system serve as symbols of political reconciliation between the individual and the collectivity. Characterizing the United States as a culture of institutionalized individualism and Canada as a culture of emotionally tepid group conflict, Merelman finds Britain's culture of group-based political debate the most successful in encouraging democratic participation. Drawing on symbolic anthropology, poststructuralist literary theory, and positivistic analyses of attitudes and media influence, Merelman conducts a controlled comparison of media representations, political discourse, and public opinion, using rich, complex sets of quantitative and qualitative data. He concludes that culture is not reducible to institutional interests but is intelligible as a whole structure; furthermore, culture can and sometimes does change the contours of political conflict.

canadian business magazine: The Scandalous Rise of Inequality in Canada LARS

OSBERG, There are more billionaires than ever in Canada – and they are capturing an ever-growing share of the country's wealth. Meanwhile 90% of Canadians are steadily losing ground. Understanding how and why this is happening has been the focus of a lifetime of research by economist LARS OSBERG. In this book, building on his earlier book *The Age of Increasing Inequality*, he describes how inequality has grown steadily over decades – but is now accelerating in the post-Covid world. The Trudeau government came to power promising action to make the rich pay a fairer share, and to reduce inequality. In office, they did virtually nothing and Canada's rich are richer than ever. Other countries are finding effective ways to tackle inequality. International organizations are proposing innovative measures to prevent the wealthy from using tax havens, and to impose new taxes capturing wealth from billionaires and globe-spanning tax-avoiding multinationals like Apple and Microsoft. LARS OSBERG identifies measures that Canada can take so that the country's wealth is shared more fairly, and the wealth of billionaires can be used to improve the lives of Canada's 99%.
