The results, which are presented at the end of the thesis, reveal that travel management tools are on the spot for micro, small and medium-sized enterprises but by far not as much that one could say the market is saturated, since 29 percent of the companies are currently applying travel management tools, but more than half of them have not yet thought about the matter. The findings also show that corporate credit cards and online booking engines are by far the most popular tools and that travel policies and online booking engines are the most efficient tools for micro, small, and medium-sized enterprises with respect to their corresponding cost saving potential.
