Types of Financing Offered by the CDC

The CDC primarily focuses on providing financing through the SBA 504 loan program. This program is designed to help small businesses purchase fixed assets. The types of financing available through the CDC include:

cdc small business finance reviews: OECD Development Co-operation Peer Reviews: United Kingdom 2020 OECD, 2020-11-12 The OECD's Development Assistance Committee (DAC) conducts reviews of the individual development co-operation efforts of DAC members once every five to six years. DAC peer reviews critically examine the overall performance of a given member, not just that of its development co-operation agency, covering its policy, programmes and systems. They take an integrated, system-wide perspective on the development co-operation activities of the member under review and its approach to fragility, crisis and humanitarian assistance. The United Kingdom uses its global standing and convening power to promote an evidence-based approach to stability, inclusion and prosperity and continues to provide 0.7% of its national income as Official Development Assistance (ODA). The depth and breadth of its expertise, combined with flexible funding instruments and strong country presence, allow the United Kingdom to focus these ODA resources on developing country needs, while protecting its own longer-term national interests. Articulating a clear and comprehensive whole-of-government vision for its support to international development would allow the United Kingdom to reinforce its policy priorities and engage the public. Further measures to build effective partnerships and institutional capacity in developing countries would allow the United Kingdom to build ownership of development processes and contribute to lasting change.
