business with uber: Uber—Brave New Service or Unfair Competition Jasenko Marin, Siniša Petrović, Mišo Mudrić, Hrvoje Lisičar, 2019-10-19 This book analyzes the legal issues connected with the provision of Uber-related services. It primarily focuses on the various contractual and non-contractual relationships that occur during the use of Uber applications, especially with reference to Uber headquarters (Uber App), Uber branch offices (advertisements), Uber partner drivers (employees or self-employed), Uber application registered users, Uber transportation service users (contracting passenger) and third-party Uber transportation service users (additional passenger). It also provides a comparison of standard transportation services and contracts of carriage, irrespective of whether the carrier in question is a common carrier, contractual carrier, actual carrier or an intermediary service provider. Furthermore, the book presents the relevant case law, especially with regard to Uber as a taxi service, Uber as a share-riding service, Uber as a rent-a-car with driver service, Uber as an employer and Uber as a key organizer of transportation service, in Croatia, Belgium, Germany, Italy, the Netherlands, United Kingdom, United States, Hungary, Argentina, and France. Lastly, it explores the different legislative approaches to resolving various issues related to the appearance of Uber and similar companies – the Laissez-faire model, Status Quo model, Legal Adjustment model, and the New Legislative Paradigm model.

business with uber: Creative Destruction and the Sharing Economy Henrique Schneider, 2017-01-27 While creative destruction and disruptive innovation change the entrepreneurial landscape; regulation – especially regulation of sectorial markets and competition regulation – can delay this change or even bring it to a halt. Uber plays an active role between these two forces: first as an agent of creative destruction and then possibly in championing regulation on its own terms. Grounded in a particular understanding of the economic concept of the market as a series of processes, this book explores the implications of creative destruction, competition regulation and the role that businesses play. Instead of discussing these relations in a purely abstract manner, this book uses Uber as a case study.

business with uber: Digital Business Leadership Ralf T. Kreutzer, Tim Neugebauer, Annette Pattloch, 2018-04-27 This book provides specialists and executives with a clear, yet practical set of recommendations to meet the challenges of digital transformation and ensure long-term success as a leader in a primarily digital business world. The authors describe the fundamental principles of digitization and its economic opportunities and risks, integrating them into a framework of classic and new management methods. The book also explores how increasing digitization – not only of communication, but of complete value chains – has led to a need to establish a digital business leadership. Digitization is changing people and markets: it causes the upheaval of entire industries,

creates new digital-centric companies, and forces established companies to cope with the transformation activities associated with these digitization processes. New approaches and methods have to be learned, tried and tested patterns of thinking have to be explored, and last but not least, innovation activities have to be understood as continuous necessities. At the same time, digital business offers considerable opportunities for renewing competitive advantages, improving existing process structures and realigning products, services and business models.

business with uber: Uber B. Yasanthi Perera, Pia A. Albinsson, 2020-01-16 Uber is one of the most innovative companies of our time. This book provides a detailed analysis of the company and its success and goes beyond the headlines about safety and culture. Many of us are so accustomed to using Uber today that the name of the innovative ride-sharing company has become a verb, as in to Uber somewhere, and yet Uber has been around only since 2010. Uber has disrupted the ride-hailing industry, from making it easier and more affordable to become an Uber driver than a cab driver to rating riders as well as drivers. As an early pioneer in using technology to create a new business model and new efficiencies, Uber is considered one of the most important case studies in the sharing economy. However, little in-depth information exists on this innovative company. This book traces Uber's origin and evolution in the face of competitive pressures, discusses the company leadership and corporate culture, addresses such controversies as rider and driver safety and sexual harassment of female employees, and explores how the company is addressing these challenges. Students of business, entrepreneurs, and anyone interested in the development and exponential growth of the sharing economy will benefit from reading this book.

business with uber: Law at Work Harry Glasbeek, 2024 In a series of illuminating essays, the renowned Harry Glasbeek unpacks how law has been used to ensure that workers' aspirations are kept in check. *Law at Work* uncovers how the legal system, through its structures and mechanisms, legitimizes and reinforces the exploitation of workers. Using historic and contemporary examples, Glasbeek illustrates how conscious manipulations of law are part and parcel of how law protects capitalists at the expense of workers. He proves how the very laws designed to safeguard rights and freedoms often act as invisible shackles, compelling readers to reflect on their own struggles as they navigate a world where the legal system fails to serve their interests. These manipulations are made to look innocent because the underlying structures and ideology which give rise to specific rules are not challenged or challengeable. This thought-provoking book is an indispensable resource for those seeking to understand the hidden dynamics of worker oppression, empowering readers to question prevailing narratives and envision a future where the law truly serves the interests of all.
