citizen bank business credit card: Debt for Sale Brett Williams, 2011-04-20 Credit and debt appear to be natural, permanent facets of Americans' lives, but a debt-based economy and debt-financed lifestyles are actually recent inventions. In 1951 Diners Club issued a plastic card that enabled patrons to pay for their meals at select New York City restaurants at the end of each month. Soon other charge cards (as they were then known) offered the convenience for travelers throughout the United States to pay for hotels, food, and entertainment on credit. In the 1970s the advent of computers and the deregulation of banking created an explosion in credit card use—and consumer debt. With gigantic national banks and computer systems that allowed variable interest rates, consumer screening, mass mailings, and methods to discipline slow payers with penalties and fees, middle-class Americans experienced a sea change in their lives. Given the enormous profits from issuing credit, banks and chain stores used aggressive marketing to reach Americans experiencing such crises as divorce or unemployment, to help them make ends meet or to persuade them that they could live beyond their means. After banks exhausted the profits from this group of people, they moved into the market for college credit cards and student loans and then into predatory lending (through check-cashing stores and pawnshops) to the poor. In 2003, Americans owed nearly \$8 trillion in consumer debt, amounting to 130 percent of their average disposable income. The role of credit and debt in people's lives is one of the most important social and economic issues of our age. Brett Williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most Americans by propelling the social changes that are enacted when an economy is based on debt. Williams argues that credit and debt act to obscure, reproduce, and exacerbate other inequalities. It is in the best interest of the banks, corporations, and their shareholders to keep consumer debt at high levels. By targeting low-income and young people who would not be eligible for credit in other businesses, these companies are able quickly to gain a stranglehold on the finances of millions. Throughout, Williams provides firsthand accounts of how Americans from all socioeconomic levels use credit. These vignettes complement the history and technical issues of the credit industry, including strategies people use to manage debt, how credit functions in their lives, how they understand their own indebtedness, and the sometimes tragic impact of massive debt on people's lives.

citizen bank business credit card: Financial Services in the Twenty-First Century John JA Burke, 2021-07-05 This textbook covers financial systems and services, particularly focusing on

present systems and future developments. Broken into three parts, Part One establishes the public institutional framework in which financial services are conducted, defines financial service systems, critically examines the link between finance, wealth and income inequality, and economic growth, challenges conventional paradigms about the *raison d'être* of financial institutions and markets, and considers the loss of US financial hegemony to emerging regional entities [BRICS]. Part Two focuses on financial innovation by explaining the impact of the following technologies: cryptography, FinTech, distributed ledger technology, and artificial intelligence. Part Three assesses to what extent financial innovation has disrupted legacy banking and the delivery of financial services, identifies the main obstacles to reconstructing the whole financial system based upon "first principles thinking": Nation State regulation and incumbent interests of multi-national companies, and provides a cursory description of how the pandemic of COVID-19 may establish a "new normal" for the financial services industry. Combining rigorous detail alongside exercises and PowerPoint slides for each chapter, this textbook helps finance students understand the wide breadth of financial systems and speculates the forthcoming developments in the industry. A website to serve as a companion to the textbook is available here: www.johnjaburke.com.

citizen bank business credit card: Criminality and Business Strategy John Zinkin, Chris Bennett, 2022-10-03 Criminality and Business Strategy: Similarities and Differences explores what can be learned from criminal organizations on four continents based on comparisons of their historical and cultural origins, chosen governance and power structures, and business models. It discusses how these contexts determined their applications of the principles and practice of effective, but amoral leadership, and whether these lessons can be applied to legitimate business enterprises. In this book John Zinkin and Chris Bennett argue that defining a crime is a contested issue and that criminality can be viewed as a spectrum, comprising a range of different types of crimes, the harms caused, and the variety of punishments involved. They discuss the critical role of the state in determining where criminality is perceived to sit on the crime continuum. The authors delve into how the state and organized crime are natural competitors, and how organized crime and legitimate businesses are subject to many of the same internal and external strategic considerations. They contend that the resulting similarities between criminality in organized criminal organizations and legitimate businesses are greater than the differences and that the differences are only in degree and not in kind. This thought-provoking study of criminality will be of immense interest to professionals, coaches, consultants, and academics interested in the techniques and ethics of leadership. The book is, in effect, the result of an intellectual journey of the authors from the ideas presented in their earlier book, *The Principles and Practice of Effective Leadership*, to the issues in this book discussing important, difficult, and contested subjects. The journey continues in their third book: *The Challenge in Leading Ethical and Successful Organizations*.
