chime business: Personalization and Digital Social Markets Tahir M. Nisar, 2025-01-09 Tahir Nisar presents a cogent, compelling account of recent developments and disruptions within the digital economy, and particularly within the industrial and service sectors. Through an original, overarching framework rooted in the concept of personalization and its antecedents, Nisar identifies radically new forms of relationships, both economic and social, among firms and customers. These new relationships are driving major changes in commercial and industrial firms' policies and practices, and in turn, in the entire market economy. E-commerce trading, user-generated content, virtual communities, co-creation, influencer movements, FinTech, and sharing economies have strengthened the hands of consumers and have encouraged developments in cognitive technologies such as AI automation, which in turn create new ways of working and disruptions to traditional capital-labour relations. Ultimately, what emerges from this study is a picture of how digital technologies unleash forces of change that are creating new forms of social and economic sharing arrangements and new forms of social organization. For its empirical depth and theoretical rigor, this book is essential reading for researchers and students interested in emerging, alternative forms of economics, business, and management, and particularly those interested in the digital economy and the state and future of capitalist markets.

chime business: *Outcasts United* Warren St. John, 2009-12-01 The extraordinary tale of a refugee youth soccer team and the transformation of a small American town Clarkston, Georgia, was a typical Southern town until it was designated a refugee settlement center in the 1990s, becoming the first American home for scores of families in flight from the world's war zones—from Liberia and Sudan to Iraq and Afghanistan. Suddenly Clarkston's streets were filled with women wearing the hijab, the smells of cumin and curry, and kids of all colors playing soccer in any open space they could find. The town also became home to Luma Mufleh, an American-educated Jordanian woman who founded a youth soccer team to unify Clarkston's refugee children and keep them off the streets. These kids named themselves the Fugees. Set against the backdrop of an American town that without its consent had become a vast social experiment, *Outcasts United* follows a pivotal season in the life of the Fugees and their charismatic coach. Warren St. John documents the lives of a diverse group of young people as they miraculously coalesce into a band of brothers, while also drawing a fascinating portrait of a fading American town struggling to accommodate its new arrivals. At the center of the story is fiery Coach Luma, who relentlessly drives her players to success on the soccer field while holding together their lives—and the lives of their families—in the face of a series of daunting challenges. This fast-paced chronicle of a single season is a complex and inspiring tale of a small town becoming a global community—and an account of the ingenious and complicated ways we create a home in a changing world.

chime business: The Oxford Handbook of Mobile Music Studies, Volume 2 Sumanth Gopinath, Jason Stanyek, 2014-03 The two volumes of *The Oxford Handbook of Mobile Music Studies* consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, mobile music opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 2 investigates the ramifications of mobile music technologies on musical/sonic performance and aesthetics. Two core arguments are that mobility is not the same thing as actual movement and that artistic production cannot be absolutely sundered from the performances of quotidian life. The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers; sound vehicles such as boom cars, ice cream trucks, and trains; the gestural choreographies of soundwalk pieces and mundane interactions with digital media; dance music practices in laptop and iPod DJing; the imagery of iPod commercials; production practices in Turkish political music and black popular music; the aesthetics of handheld video games and chiptune music; and the mobile device as a new musical instrument and resource for musical ensembles.
