consumers and business affairs: *Financial Euphoria, Consumer Culture, and Literature of 1980s Japan* Ikuho Amano, 2022-12-30 This book is an interdisciplinary study of Japan during the socially euphoric years of the Bubble Economy in the 1980s. Shedding light on consumer experiences, this study explores the socio-cultural landscape of Japan, the nation that boasted the second largest economy in the late twentieth century. Drawing its analysis from various media sources, popular literary works, and public reports, the book articulates how the late 1980s calibrated consumer demands, lifestyles, and perceptions of wealth. Through an examination of the qualitative effects of 'Bubble money' on consumers, the book disentangles the anatomy of the festive ambience in the economic phase, closely reading fictional and non-fictional literary works that play the role of reportage, critique, and satire. Through observations of human behaviours in consumption, the book reveals psychosomatic experiences and self-consciousness. Featuring a wide range of sources from Japanese media and literary works which have yet to be translated for an English audience, this book will be a valuable resource for students and scholars of modern Japanese culture and literature who are interested in the socio-economic landscape of late-twentieth-century Japan.

consumers and business affairs: Washington Information Directory 2022-2023 CQ Press, 2022-08-23 The Washington Information Directory (WID) is a directory, with a unique profile - it is topically organized, and within the taxonomic structure the relevant organizations are listed not only with contact information but with a brief paragraph describing what the organization (whether government or non-governmental) does related to that topic. It focuses on Washington - in order to be listed, an organization must have an office in the Washington metropolitan area. These descriptions are not boilerplate advertising material from the organizations; rather, they are hand-crafted by a talented freelance research team. In addition, WID pulls together 55 organization charts for federal agencies, congressional resources related to each chapter topic, hotline and contact information for various specific areas of interest, and an extensive list of active congressional caucuses and contact details. WID has two appendices, one with thorough information on congresspersons and committees, and the second with governors and embassies.
