E-business, or electronic business, refers to the process of conducting business processes on the internet. The rise of the internet has transformed traditional business models, allowing companies to reach a global audience with minimal overhead costs. E-business models can be categorized into various types including Business-to-Consumer (B2C), Business-to-Business (B2B), Consumer-to-Consumer (C2C), and Consumer-to-Business (C2B).

Each of these models caters to different market needs and customer interactions.
