dna clothing line still in business: 'Salt of the Earth' Salena Zito, 2024-12-04 "Despite the wealth of information at our fingertips in the information age, there is a glaring emptiness that plagues us in our storytelling. We remove nuance and replace it with sensationalism. We shun original stories because they stray too far from the pack. In the process, we miss the beauty, pain and magic, the simplicity and grace of simple, real-life stories about the ordinary lives of people who work the soil to make America possible. The result is that we lose touch with who we are as a nation." In this collection of syndicated columns from 2023 and 2024, Zito pays attention to those stories. From talking with workers in small towns to covering the biggest political figures of our time, Zito paints a picture of where the country is after the midterm elections all the way through the final summer of presidential campaigning. She approaches each subject with compassion and curiosity and strives to ensure that no everyman is forgotten or ignored.

dna clothing line still in business: Managing Business Ethics Alfred A. Marcus, Timothy J. Hargrave, 2019-12-19 *Managing Business Ethics: Making Ethical Decisions* teaches students how to navigate ethical issues they will encounter using the weight-of-reasons approach applied throughout the book. This decision-making framework's goal is not to faithfully apply particular philosophical perspectives on what is right, but rather to solve ethical problems. Authors Alfred A. Marcus and Timothy J. Hargrave underscore the need for employees at all levels to carefully consider the ethical implications of their actions using this approach and it can be applied at the individual, organizational, and stakeholder levels. Each chapter provides a case to walk through application of the framework and mini-cases allow students to practice applying this framework on their own. A wide range of real-world case studies are presented, featuring companies such as Facebook, Google, Wells Fargo, Volkswagen, and Amazon. This practical, down-to-earth text also delves into topics not covered extensively by other books such as slow and fast thinking, the inherent conflict between the individual and organization, conformity, and the difficulties of speaking truth to power. Students are offered ample opportunity to engage in thoughtful reflection, discussion, and application as they grapple with ethical issues big and small.

After spending three years researching his novel Baked, Mark Haskell Smith turns his focus on the one event that intrigued him in the fascinating world of the cannabis culture: the Cannabis Cup competition. What makes a strain of marijuana award-winning? he wonders. Who would risk everything to grow the good stuff? Is this really a nearly \$100 billion a year industry?
