dhl for small business: TA-Q-BIN Qizhang Liu, Mark Goh, 2015-10-16 This book reveals the secrets of Yamato Transport's success in maintaining and extending its leadership in Japan's domestic parcel delivery market. It presents six cases that illustrate how Yamato's flagship service, TA-Q-BIN, has evolved since the 1970s to the benefit of consumers, particularly urban dwellers, and how TA-Q-BIN has become an integral part of Japanese daily life. Each of the six unique cases serves as an independent teaching case for undergraduate and graduate students, describing the particular service design, operations management, innovation, supplier management, and social responsibility within the context of an Asian last-mile logistics service provider. The book also includes insightful presentations of the challenges facing supply chain and logistics service providers in Asia, and their innovative responses to these challenges using real-world cases. Besides featuring interviews with Yamato's key stakeholders and their strategic clients, Japan-based and other Asia-Pacific Yamato operational centers make up the field method included in this book, while secondary data is drawn from trade and academic domains. Some of the cases are written in a didactic fashion, with suitable stopping points for students to pause and deliberate over the managerial issues confronting the decisions that Yamato makes during the course of its business and operational strategies. The results are particularly useful to readers interested in how operations and logistics decision-making are practiced in a homogeneous Asian context and in an urban environment. This book is essential reading for undergraduate and MBA students, as well as practitioners in industry.

dhl for small business: Managing as Designing Richard J. Boland Jr., Fred Collopy, 2004-07-28 Managing as Designing explores the design attitude, a new focus for analysis and decision making for managers that draws on examples of decision making and leadership in architecture, art, and design. Based on a series of conference papers given at the opening of the Peter B. Lewis Building (designed by Frank Gehry) at the Weatherhead School of Management, Case Western Reserve University, the book includes keynote speeches from Frank Gehry and Karl Weick. The premise of this book is that managers should act not only as decision makers, but also as designers. Though decision and design are inextricably linked in management action, managers and scholars have too long emphasized the decision face of management over the design face. In a series of essays from a multitude of disciplines, the authors develop a theory of the design attitude in contrast to the more traditionally accepted and practiced decision attitude. The book will appeal primarily to scholars of management theory and organization strategy and managers, with many contributions from a variety of academic backgrounds including architecture, sociology, design, history, choreography, strategy, economics, music, and accounting. There is a potential for strong crossover appeal to these groups, especially to those people and groups interested in design and product development.

dhl for small business: The Global Player: How to Become "the Logistics Company for the World" Thomas Musiolik, 2012 According to Frank Appel, CEO of Deutsche Post DHL, within its Strategy 2015 framework, DHL will become the logistics company for the world. In times of globalization and economic downturn, the effects of which can be felt in the entire logistics industry, this goal is an enormous challenge for DHL. In order to attain this goal, it is essential for DHL to create a closer linkage of its business areas, to slim down its processes and to put a stronger focus on the ever-changing needs of the customer. The objective of this book is to offer cost reduction solutions and give suggestions on how quality can be improved, which will distinguish DHL from its competitors while fulfilling the needs of the customer, i.e. become the logistics company for the world. This book is divided into four sections. First, there is a synopsis of the history of DHL, as well as a description of its organizational and corporate structure and concludes with a comparison of the business segments of DHL with its main competitors. After that, the corporate strategy is analyzed: (1) its core competencies, (2) its mergers and acquisitions, (3) Ansoff, and (4) BCG/BCG II. The section concludes by examining which strategy could be appropriate for a successful future for DHL. The third section deals with the competitive strategy of DHL. Porter's Five Forces are utilized to analyze the attractiveness of the industry, as well as its competitors, suppliers and customers. This is followed by an analysis of the appropriate strategy for DHL Logistics by means of the Generic Strategies according to Porter, the Hybrid Strategies, the TOWS and an evaluation of the strategic options. The next step will explain the appropriate processes for the strategy of the value chain. A Scenario 2020, which draws a picture of what the industry might look like in ten years, concludes this section. The final section will highlight the factors that can give DHL sustainable competitive advantages. The functional strategies are presented, the global key markets are analyzed and appropriate strategic alliances are examined. The author sets great value upon clear and interesting statements that ensure an easy understanding of the subject matter but at the same time facilitate a fast transfer into practice.
